C. B. HALPIN & SONS, Publishers.

## An American Magazine Tells of Canada's Progress

"Liberty," a United States magazine with a circulation of about three million copies a week, published the following editorial in a recent issue:

"Poor little dears, born into a world of suffering! What is to be of them?"

That was an elderly aunt's reaction when introduced not long ago to her brand-new niece and nephew.

We hear them often, these expressions of an older generation's sense of pity for the future of the youngsters of today.

Some of us are parents among a younger generation. Our comparatively few years of mature outlook and our limited powers of circumspection had their beginning and were nourished in a world torn with the frenzy of war. And we sometimes find ourselves wondering what may indeed lie ahead to perplex, to torture, or to destroy the bodies of these little treasures of ours to whom we have given life and for whom we stand ready to sacrifice as much.

The fact of the matter is that this old world, by and large, has been a whole lot better to us than it was to our fathers and our forefathers. And the forces at work in the world today make it a still better place for our children. But the doubters, the scoffers, and the fearmongers must have their fling.

What would we do without the telephone? Yet they were Canadians of an older generation who laughed at Bell when, during early days spent in this country, he tinkered and talked about a possible means of transmitting the human voice over great distances.

What would we do without the electric light? Yet many Canadians at about the time of Confederation mocked Edison, then a Canadian telegraph operator, as he tinkered and talked about making light himself by the mere flip of a button.

Thousands of living Canadians and millions more of living human-kind throughout the world today owe the fact that they ARE living to Banister's famous discovery of insulin for sufferers from diabetes, one of the worst scourges of the race throughout the centuries. Yet his fellow students at Toronto University deemed him an eccentric dreamer.

Many people living today and many generations yet unborn owe, and will continue to owe, much of their physical well-being to the profound medical knowledge of the late Sir William Osler, another great Canadian.

The means of health and happiness to which half a century ago generations of mankind have fallen heir are almost unbelievable in number and miraculous in nature. Canada stands at the top of the list with the lowest death rate of all the nations on earth. Only half as many people in Canada are now dying before their time as was the case a comparatively short lifetime ago.

We are better educated than were our fathers and our forefathers. Our children are being better educated than we were. In the next ten years so through has been the operation of our educational system in Canada, with increased regularity of attendance in our schools, that the average pupil today is getting something like a full year added to his school life. Two-thirds of Canada's growing citizens are now getting as far as the entrance to high school. Less than half got that far fifty years ago and they didn't learn half so much. Nearly fifty per cent. are getting past year through high school and one-fifth pass through the final year. Nearly two and a half times as many students are attending the technical and vocational schools as were enrolled in 1921. Such schools were unheard of in the country twenty years ago.

Fifty years ago laboratories were non-existent in Canada except for a few elementary ones of scant accommodation. Today millions of dollars and invested and hundreds of workers are engaged in Canadian university, government, and industrial laboratories.

The test of our ability to see and appreciate all these things is to look for them ourselves and realize what they mean to us.

Paternal pity for children facing a dismal future dates back to the cave man era. But do not waste too much pity on these growing youngsters. We have bestowed upon them a heritage to enable them to live more abundantly than any generation in the past.

### NEW PAPER TAX

Ottawa, April 30—Additional taxation imposed by the Budget, delivered in the House of Commons on March 30th went into effect May 1st. This is a three-cent excise tax on Commercial paper.

## The Tax on Sugar Not Very Popular

A nasty situation has developed in connection with the imposition of a two cents a pound tax on sugar, one of the most startling provisions of this year's budget. It is claimed that information about this tax would be imposed leaked out before the budget was brought down and that an attempt was made to secure a financial "clean-up." It is a situation which most assuredly should be looked into, for no better reason than to maintain the confidence of the people in the administration. Yet this does not constitute the most important aspect of the sugar tax problem.

We believe that in its own interests the Dominion Government should explain precisely why the tax on sugar was included in the budget. That it would be an unpopular measure is Mr. Rhodes must have anticipated and his courage in nevertheless proceeding with it is to be admired. Yet courage is not quite enough.

Why has the Dominion government imposed a tax upon what has become a human necessity, when there are other products widely purchased which are not strictly speaking necessities. There are tobacco, beer, table luxuries and a hundred and one other products. It might have been better to tax two or three semi-luxuries than one necessity.

The tax means that the poor citizen will pay almost as much in regard to sugar as the rich, for sugar consumption does not vary greatly with position.

No doubt there is an explanation, and it certainly should be given.

## Moscow is Angry

As was expected, Moscow was anything but pleased with Britain's announcement of an 80 per cent. ban on Russian imports following the trial of six British subjects charged with espionage and sabotage.

"Investia," newspaper organ of the Soviet Government, expressed the official view in a broadside aimed at "British Imperialism." "Canada even presents in the article," writes the Russians accusing John Bull of attempting to use the recent trial to promote the empire trade program laid down at the Imperial Economic Conference in Ottawa last summer.

The British Government, "Investia" says, pledged itself at Ottawa to favor Canada at the expense of the U.S.S.R. in order to keep this country from closer relations with the United States, and the recent trial was being used for that purpose.

The Soviet anger is easily understood when one reads a despatch from Moscow expressing the opinion that Britain's embargo on Russian imports will create a serious situation from the standpoint of the Moscow government. The Soviet, it is pointed out, is able to meet foreign commitments only by preserving a favorable trade balance. Russia's export trade with the United Kingdom is valued at \$120,000,000 annually. Without this revenue, observers say, the ability of State control of individual enterprise in order to free the individual from the slavery which has resulted from individualism gone wild.

That is why President Roosevelt is such an interesting figure today. He is a Liberal; he may go down in history as one of the great Liberals—yet all the remedial measures so far proposed by him have been Socialistic in nature, designed to strengthen the control of individual enterprise by the State. He cannot do anything else, for the "rugged individualism," which Hoover so fervently endorsed before the machinery of distribution became dislocated is the greatest obstacle in the way of freedom today. The tragedy is anything but rugged.

### ST. ANDREW'S CHURCH

Pastor, Rev. R. B. Layton

Mr. L. D. Wright, G.U.E.C.C. Sunday, May 7th

11:00 a.m. Morning service and Sunday School.

7:30 p.m. Evening service. The Choir will give the last half of the Easter Cantata, "Jesus Lives."

Mother's Day will be observed on Sunday, May 14th.

The regular monthly meeting of the Board will be held on Tuesday evening, May 9th.

## REPORT RAILWAY PAY CUT UPHELD

Toronto—Between 15,000 and 20,000 men engaged in the five running trades of the Canadian National and Canadian Pacific Railways throughout Canada are to take a further cut of 10 per cent on their original basic salaries, according to the report of the Board of Conciliation, it is learned on the most reliable authority, the Toronto Telegram said Thursday.

The newspaper added: "Full details of the report are not yet to hand but will be announced by the Dominion minister of labor."

"Whether the men will take the cut is not yet decided by heads of the unions involved but the board of conciliation, it is known, in their report found in favor of the railway companies."

"The award was decided Tuesday by the board in Montreal and turned over to the minister of labor the same evening."

"The running trades affected are engineers, firemen, conductors, brakemen, trainmen and railway telegraphers and throughout the country, almost 20,000 men will be affected."

"The men had hoped for a compromise of a further 5 per cent. cut but the board found the economic and financial positions of the railways would not permit anything but a 20 per cent cut."

## PRESIDENT OF PERU ASSASSINATED

Lima, Peru, April 30—Luis M. Sanchez Cerro, president of Peru since December 1931, was assassinated today a short time after he had reviewed a parade of 20,000 young men in Jorge Chavez park.

His assassin, Abelardo Hurtado de Mendoza, fired several shots into the president's body as the executive party started to drive away from the park, and then himself was slain by presidential guards. The attack was so sudden, elaborate precautions which had been made to protect the president's life were unavailing.

## THE LIBERAL AND "RUGGED INDIVIDUALISM"

In these uncertain times Liberals seem to be largely concerned with the business of trying to define Liberalism, while members of the Co-operative Commonwealth Federation are concerned with avoiding the precise definition—or perhaps we should say re-definition—of Liberalism.

Mr. Vincent Massey in his Windsor speech and Mr. Mackenzie King in his comments some time ago on the C.C.F. resolution in the House of Commons concerning the burning of the definition—or perhaps we should say re-definition—of Liberalism.

It is apparent that Liberals are worried about this matter, and there is every reason why they should be. For curious contradictions have crept into Liberalism since the burning of the definition—or perhaps we should say re-definition—of Liberalism.

In the old days, when the individual was fighting for political liberty and unrestricted play for the individual within the State, the way of the Liberal was clear. Today, however, if the Liberal is to maintain the principles of Liberalism (and continue to fight for freedom of the individual and limitation of privilege) he must reconcile himself to the measure of State control of individual enterprise in order to free the individual from the slavery which has resulted from individualism gone wild.

That is why President Roosevelt is such an interesting figure today. He is a Liberal; he may go down in history as one of the great Liberals—yet all the remedial measures so far proposed by him have been Socialistic in nature, designed to strengthen the control of individual enterprise by the State. He cannot do anything else, for the "rugged individualism," which Hoover so fervently endorsed before the machinery of distribution became dislocated is the greatest obstacle in the way of freedom today. The tragedy is anything but rugged.

### J. C. F. BOWN IS DEAD

IN EDMONTON

Edmonton, April 28—Dr. J. C. F. Bown, 77, city solicitor of Edmonton for the past 26 years and president of the Alberta Law Society died at his home here Thursday evening after a lingering illness.

In recognition of his outstanding services to the city and the province, the University of Alberta conferred upon him the honorary degree of doctor in laws in 1930.

Dr. Bown was born in Brantford, Ontario in 1858. His father, John Young Bown, was elected to the House of Commons in 1887 as Conservative member for North Brant in the first election after Confederation.

## Record Crowd In Attendance At Big Fight

Over 700 people attended the fight here on Friday night last. Fans from North, South, East and West attended, and never before was the old Comet Theatre so crowded. The favorite of the evening among the fans was undoubtedly O'Brien, who had endeavored himself to fight fans here last fall, by his good sportsmanship in refusing to accept a decision when he was fouled in a fight with Boehlke. O'Brien and Boehlke battled through nine and a half rounds, and the bout was ended when Boehlke brought over his left and struck O'Brien very low and Referee Wells awarded the fight to O'Brien on a foul. Boehlke had been warned several times in the early rounds of the match about hitting too low. In the second round of the battle, O'Brien was forced to the ropes, and although he was not down, the referee began to count, the reason for this was not understood. However, Boehlke is a great fighter and showed the large audience plenty of action. O'Brien took everything Boehlke could send over, and all the punches that landed on him failed to bother him a bit. During the first six rounds of the battle O'Brien was on the defensive and made Boehlke bring the fight to him. In the first part of this fight Boehlke piled up a lot of points through forcing the fight, but O'Brien gained a lot of points the last three rounds by forcing all the fight to Boehlke. O'Brien has an almost perfect system of defence and can take a tremendous amount of punishment. Boehlke is a fast man and a perfect fighter.

The feat in the last round marked an otherwise perfect fight and many of the fans were of the opinion that had the fight continued to the end of the round, the fight would have been a draw. The majority of the fans present wanted to see O'Brien win the bout, and although they were disappointed that the fight ended in a foul, they were nevertheless pleased that O'Brien won the decision. The win by O'Brien was Boehlke's first defeat, and all fans congratulate him on his victory.

The Semi-Final bout between Pete Holm, of Lacombe and Red Eavens of Athabasca ended in short order. Pete stepped into the ring in absolute confidence, and although his opponent was a fighter of some repute in the north country it was evident to everyone that Pete had been man outclassed. After about half a minute of sparring, Pete got in a terrific right to the body and Eavens was left to the body and Eavens was out for the count. That boy Pete sure packs a wicked punch, and has plenty of science. Fans were somewhat disappointed at the short duration of this fight, but when Pete knocked them down they stay down. Another short bout was the one between Welch and Wilkinson. About half a minute after the going sound to start this bout, Welch landed a hard one on Wilkinson's chin which sent him to the canvas. From then on, Wilkinson spent most of his time on the floor. Welch knocked him down no more than six times and after the sixth knock down, the referee stopped the slaughter.

Webb Frizzell and Young Smith fought a great four round bout. The decision went to Frizzell who certainly showed a lot of class. All the fans were pleased with this battle.

Denver Kid and Young Boucher put up a real fast battle, the decision going to Denver Kid. These two featherweights have a lot of speed. A short but fast bout took place between Don Wells and Babe McBain. McBain, who hails from Athabasca was no match for Don Wells, who shows wonderful promise. Don took his opponent in the second round of the scheduled 6-round bout. Wells, who finished his training here, showed his good training, and had very little trouble defeating his man. Wells should go a long way in the fighting game, although he is not a very heavy man, he packs a terrific punch.

The Whitesides-Alcide exhibition bout ended in a draw. This was a real good fight and although an exhibition, both fighters seemed to be putting plenty behind their punches. Alcide seemed to be the most aggressive of the two, and at times seemed too much for Baden.

Owing to an injury received while training, Scotty McPherson, was unable to fight Young Shanks at Athabasca, but his place was most ably taken by Clive Simons. Clive has fought here before and got a big band from the fans. He took his man in the second round with very little effort.

The judges for this big tournament were Inspector McLean, of Red Deer and Joe LaFrance, also of Red Deer. These judges were very fair and impartial.

## Referees were Walter Wells of Red Deer and Tom Gravelly, of Stettler.

A slight misunderstanding took place between these referees, but was finally settled to the satisfaction of all concerned. At best, a referee's path is seldom strewn with roses, and to referee any tournament or game to the entire satisfaction of everyone is almost an impossibility. We are sure in our minds that both Wells and Gravelly refereed the bouts as they saw them, and if any of the fighters appeared to be favored, we feel certain that the favoring was unintentional. We are of the opinion that fans and fighters alike should accept the decisions of a referee without question and co-operate with him in every way as his job is far from a pleasant one. Fans and fighters could help a lot to make a referee's job a little more pleasant.

Arrangements for the big tournament were most complete, and though the old Comet Theatre was packed to the doors, all fans could see the ring clearly.

Jimmy Toller and Bob Parks who promoted this big event are to be congratulated on its success.

An interesting fact with regard to the tournament was that all five of the fighters who were trained at the Lacombe Gymnasium under the direction of Harry Murray won their battles. These fighters were: Patsy O'Brien, Pete Holm, Don Wells, Denver Kid and Young Frizzell.

Another fight looms on the not too distant horizon, and Jimmy Toller, assures us that if this fight comes off, it will be even better than the last one.

## TOWN NEWS

C.K.L.C., Red Deer's radio station has been closed.

Bretton Hall, one of Banff's oldest hotels, was destroyed by fire on Saturday.

Before Magistrate Jones at Red Deer on Thursday, April 26, J. E. Bone was fined \$20 and costs for supplying liquor to a minor.

Mrs. Anna Katherine Bergstrom died at her home, ten miles south of Eckville and seven miles southwest of Evans, on Sunday, April 23, 1933, after a lingering illness. Mrs. Bergstrom came out from Sweden together with her husband and children and settled on the northwest quarter 26-37-3-W5, where her death took place.

Farmers Attention! We are now grinding wheat, oats, barley or rye, at 6c. per cwt. W. J. Trott.

Two young Eckville farmers took R. M. MacKenzie's car from Eckville on Monday evening and after driving it for a few miles abandoned it in a mud hole. Const. Yuill, R.C.M.P., went out and the sequel was the appearance of August Kangas and Armi Wantti before Magistrate Jones on Tuesday, charged with taking a car without the owner's permission. Kangas pleaded "not guilty" and was fined \$20 and costs. Wantti pleaded "guilty" and was fined \$15 and costs.

Do not wait until Mac's Best No. 1 flour goes higher in price; buy now; per 98 lb. cotton sack \$1.48. Every sack guaranteed. W. J. Trott, Lacombe.

## GIRL DROWNED WHEN CAR OVERTURNS IN DITCH

Dysart, Sask., April 30—Pinned beneath an upset auto in a ditch of water, Nanna Barkwell, aged 21, was drowned Saturday night near here. She was returning from Regina with a party of McDonald Hills post office residents when the car slipped off the road on a rough grade. The girl tried to jump out, but the tipping auto fell on her and held her under a foot of water in the ditch.

The dog catcher was busy on Tuesday night, and about twenty canines were captured. Your dog may be released on payment of tax and expenses.

Put this Telephone No. in your book, and when in need of Flour, Cereals, Bran, Shorts, Chop, Etc., call the Lacombe Flour & Chop Mill. We deliver any place in town.

## Lacombe Farmers Ship Beef Steers to Old Country Market

On Saturday morning last some 95 head of choice fat yearling steers were loaded at Lacombe for the old country, their destination being Glasgow, Scotland. This shipment is part of several hundred steers which have been fed by Lacombe farmers during the past winter, and they would be a credit to any country. The animals were from the McIntyre ranch, and were all pure bred Hereford. The individuals weighed from 900 to 1475 lbs. each, the average of the shipment being 1070 lbs.

Sixty-nine head fed by Chas. Abbott gained 350 lbs. each since November 1, and 22 head fed by Elmer Lesher, gained 400 lbs. each.

Sam Henderson, who has been supervising feeding of these cattle for the provincial department of agriculture, says that they are the best cattle ever shipped out of this district.

Included in the shipment were four Aberdeen-Angus yearlings from the farm of G. A. Graham, Bentley. They were splendidly finished animals and weighed a total of 5000 lbs. Mr. Henderson stated that the farmers feeding these animals would realize at least 50c. a bushel for the grain fed.

Eighteen hundred steers were fattened here this winter, and some of them will probably be on exhibition here on Feeders' Day, some time in early June.

Threshing has started in this vicinity. Mr. Bert Blair and Mr. Astor Strandberg are busy finishing last year's crop.

Mr. Astor Strandberg had the misfortune of having his car burn en route to Lacombe, Wednesday last.

The Oddfellows held Service in the United Church, Sunday, May 7th. Everybody welcome. Special music by the choir.

Miss Dorotika Allison is spending part of her holidays with friends in Edmonton and will return to her home for three weeks, where she will be at home to her friends.

Rev. W. Leard and some members of the Church motored to Edmonton to hear the Oxford Group. The McDougall church was crowded with over 3000 listeners and Rev. Leard will give a report of this meeting May 21 at 8 p.m. Come and hear the solution for this depression.

Mother's Day will be observed on May 14th at the United Church at 11 a.m. and at 8 p.m. Special singing and music.

Jim Toller and Harry Murray are promoting a huge Sports Day celebration on 24th of May at Clive. A great programme of boxing will be included in this girls event including such top notch fighters as Patsy O'Brien, Pete Holm, Don Wells, Geo. Davies and other well known fighters.

A very comprehensive program of Sports, with baseball and other attractions is being arranged for the afternoon, while the boxing match will take place in the evening. Following the boxing a dance will be held, so no matter whether you are a fight fan, a baseball enthusiast or enjoy a dance, there will be something doing at Clive to make the day enjoyable to you. With such well and favorably known promoters as Toller and Murray sponsoring this event, its success is assured. Make the 24th of May your holiday and come to Clive.

W.I. MEETS SATURDAY MAY 6  
The regular meeting of the Lacombe Women's Institute will be held at the home of Mrs. W. Teward.

Roll Call, Best Canadian Products used by members. Reading: Mrs. R. Hoppus. Paper on Canadianization, Mrs. H. Reed. Committee: Mesdames Newton, Paul, Paulson, Reed and Sherris. Would the Convenor's please have their reports ready to hand in to Secretary to be sent to Constituency Convenor.

The dog catcher was busy on Tuesday night, and about twenty canines were captured. Your dog may be released on payment of tax and expenses.

## THE CHURCH OF ENGLAND IN CANADA

Diocese of Calgary  
St. Cyprian's Church Lacombe

Rector: The Rev. T. H. Chapman  
Organist: Miss Kathleen C. Walters, L.A.B.

Friday, May 5th. The Jun W.A. will hold its weekly meeting at the home of Mrs. H. M. Jones at 3:45 p.m.

May 7th, 3rd Sunday after Easter. 9:00 a.m. Holy Communion. 10:00 a.m. Sunday School. 11:00 a.m. Morning Prayer. 7:30 p.m. Evening Prayer.

At the Evening Service on Sunday, the Rector will deliver the first of a series of sermons on the feast of the Ascension, the title of the first of these being "Surrender." The Bishop will be here for the purpose of administering the Sacramental Rite of Confirmation or "Laying on of Hands" at 11 a.m. on Sunday, (Trinity) June 11th. Classes of instruction for those who intend to offer themselves as candidates at this time are being held at the Church every Sunday at 7 p.m. We shall expect to see you there. On Sunday, May 14th, Special reference will be made to the 39th anniversary of the formal establishment of the Parish of St. Cyprian's, Lacombe.

## The Jig-Saw Puzzle Of Life.

Have you participated in the prevailing rage or fad of these latter days of the depression—the jig-saw puzzle?

If so, what did you get out of it? A few idle hours of lazy enjoyment as you sorted out the many and variegated colored pieces, cut in all their fantastic shapes, and sought to fit them together? In that all you got for your money, your time, your intent concentration? If so, it was largely waste, and you would have been better employed in reading, or some light occupation, or even lying down in quiet and complete relaxation.

Or did you, as your fingers played with the fascinating bits of colored cardboard and you placed them together until out of a jumble of colors the design of the artist began to emerge into a thing of beauty, allow your thoughts full sway, and even study your own reactions to the comparatively idle task in which you were engaged?

For example, as hour after hour slipped by while you selected this piece and that and maneuvered about the table, endeavoring to make them fit where it seemed they ought to fit, but would not, did you become more and more impatient, or were you actually and truly developing what has become to many people—the lost art of patience? The question is: Did indulgence in this jig-saw pastime strengthen or weaken your will power to cope with the real puzzles which life itself presents?

Did working over the jig-saw suggest anything else to you? Did your employment in this form of recreation for tired bodies and troubled minds, lead to more serious thought, to a contemplation of the complications of life, the consolations of life, and, as you finally solved the puzzle, the rewards and the beauty of life? Did you pause in contemplation of your own life, and give some heed to the pattern you were weaving out of the many pieces under your control to make it a thing of beauty, or mar it with ugliness?

A well known author, writing in the current issue of a popular magazine, tells how she spent most of the night working over one of these intricate jig-saw puzzles. As she worked well into the small hours, the pattern of the puzzle continued to elude all her efforts; she could not make the design come together; it persistently lacked both coherence and purpose. She became discouraged as the hours went by, growing both impatient and inaccurate, until, at last, in extreme desperation, she laid one improbable piece against the other one, and brushed aside those sections she had nearly completed.

Having almost given up hope of successfully solving the puzzle, she saw a certain inoffensive fragment of it to one side of the table. It was a tiny piece, and yet, when she had fitted it into the puzzle, her difficulties suddenly vanished. For that tiny fragment held the necessary clue to the puzzle's color and line. Set in its place, the pattern became clear and the design stood out in bold, brave fashion. In fact, in a very short time the jig-saw puzzle had ceased to be a puzzle; it had become a picture.

Surveying the finished picture, this author said to herself: "Life is pretty much this way. It is a mass of irregular, jagged pieces until we are able to find the secret of it. It seems absolutely without meaning until we've located the key piece."

The key piece—it is all important whether in working out the solution of a jig-saw puzzle of that still more intricate pattern of our lives. As the lady we have quoted further says, many of us work doggedly through the long darkness over the jig-saw puzzle called life. Often our profitless labor carries us well into the dawn, until we meet that hour when vitality is at its lowest ebb. We are prone at this time to grow confused and inaccurate, tearing up the bits that we have put in order, trying to fit impossible sections together in a foolish manner.

This is a dangerous period in our lives,—in the lives not only of individuals, but of communities and states. It is then we are inclined to engage in rash experiments, to forsake all the groundwork and experience of the past. We do not always realize that we are discouraged and confused because the key piece is missing. But it is there, and invariably, even though that piece has long eluded us, we will find it—if we have patience and vision. It is not the part of wisdom to destroy the whole picture, but to continue to hunt for the missing piece,—the key,—that will serve to point out where other pieces have been misplaced, where additional pieces should be placed, until the whole stands out strong and splendidly completed.

And here is the greatest and kindest truth in the whole world,—the key piece is usually a little thing that lies close at hand! This is true in a jig-saw puzzle employed to pass an idle hour; it is true of the key-stone of a great and beautiful building; it is true in life itself no matter how complicated and tangled it may seem.

An acquaintance of the writer, a young lady who is slowly recovering from a lingering illness of more than a year's duration, has passed many a weary hour working jig-saw puzzles. When asked if they did not tire her, she replied: "No, but as I work at them, having little else to do but rest, I give thought to what I am going to make of my life."

As you work over your jig-saw puzzles, of what are you thinking? What are you making, what do you intend to make, of the all-important jig-saw puzzle of your own life?

More books have been written on Abraham Lincoln than any other man. Napoleon held the record prior to 1870.

The Maria, a fish that is plentiful in Lake Winnipeg, is sometimes called the fresh water ling.

## Headaches and Dizzy Spells Nerves In Bad Condition

Mr. Neil Crawford, Hamilton, Ont., writes: "My nerves were in such bad condition I found it almost impossible to get a good night's sleep. I was also bothered with headaches and dizzy spells."

I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Heart and Nerve Pills I could hardly believe the change they had made in my condition."

For sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

## Unlooked For Discovery

Tests At Cornell University Indicate Diet May Cause Heart Disease

An unlooked for discovery that diet may cause heart disease comes to light with the death of "Depression," the prize synthetic diet goat of Cornell University.

Apparently in perfect vigor, "Depression" had excited a few days ago and dropped dead. Autopsy showed death due to degenerated heart muscle, in the ventricle.

"Depression," moreover, was the sixth goat fed on the synthetic diet, and all the others died of heart disease. This was a 100 per cent. record for whatever caused the fatal diet deficiency.

The diet substitutes cellulose for hay. It includes starch, casein, the solid part of milk, various mineral salts, yeast and cod liver oil. It is fed to goats and other animals in the Department of Animal Nutrition under direction of Dr. L. A. Maynard and Dr. C. M. McCay. The object is to discover the food factors best for animals.

Depression was 10 months old, the first herbivorous animal in history to live any length of time on synthetic "hay." His age brought home the significance of the diet heart complex.

Whether there may be human lesions in the heart diet factor is not known. In view of the fact that heart troubles cause more than twice as many deaths annually in the United States as the most fatal diseases, cancer, scientists regard the goat experiment with interest.

## FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I hit on this plan. I dropped the hem; and as the skirt had been turned under was darker than the rest, I re-velled the entire dress after having bleached the goods following directions in the Diamond Dyes package."

"I used Diamond Dyes for the re-dyeing of course. I have dyed many things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—smooth, even colors—fast to wear and washing. Friends think my things are new when I re-dye or tint them with Diamond Dyes. They do give the most gorgeous colors!"

Mrs. G.C. Lewis, Quebec

## Motorists Are Asking Outlet For Tourists

Seventeen Miles Now Limit For Driving Outside The Park

Motorists of the thriving northland mining town of The Pas, are bitten with the wanderlust and yearn for new highways to conquer. The tired business man here who goes for a drive cannot travel far. Seventeen miles is his limit—to Clearwater Lake. Thus an outlet for the tourist world, a project that would lay a 100-mile pathway through virgin wilderness to Hudson Bay Junction, in Saskatchewan.

A road of sorts to that point already exists but it is not paved for cars. Brush has been cleared but grading has yet to be done. It is hoped to have this road opened up this summer and efforts are being made to have it graded as a relief measure. Motorists here have no opportunity to register high mileage figures on their speedometers. The traffic, made up of 80 automobiles and 35 trucks, occasionally gets into a jam owing to the restricted driving area.

The car driver has a choice of four highways at present. The route to Clearwater Lake, which is the longest, is the most popular. Two other roads stretch for three miles, the other highway measures but four.

## Rejects Claim Of Norway

Hague Court Decides East Greenland Property Of Denmark

Denmark's title to Eastern Greenland has been by a decision of the Permanent Court of International Justice at The Hague, in her favor in a dispute with Norway over its ownership.

The Norwegian conceded Danish sovereignty over the remainder of Greenland, but contended that Norway was entitled to a portion of Eastern Greenland. A Norwegian expedition had landed there in 1931 and it was claimed Denmark never confirmed her ownership by colonizing the territory.

The court found that Norway's declaration of occupation and any steps which have been taken in pursuance of that declaration constitute a violation of an existing legal situation and are accordingly unlawful and invalid.

## U.S. Creates New Jobs

According to the Christian Science Monitor, the United States is about to open 250,000 jobs of a brand new kind to the unemployed. Senate and House put the final touches on the first of the unemployment measures and Department of Labor agencies will begin enrolling willing workers for reforestation, soil erosion and conservation work. Life in forest camps will beat pounding the pavement.

Footprints on the sands of time are not made by sitting down.

## National Dairy Council

Allan C. Fraser, Of Calgary, Is Appointed Secretary-Treasurer

Allan C. Fraser, well-known Calgary agriculturist, has been named secretary-treasurer of the National Dairy Council of Canada, succeeding W. F. Stephen, of Ottawa. Announcement followed the close of the two-day annual meeting of the council, at Toronto.

W. H. Forster, of Hamilton, and P. G. Colquhoun, of Maple Creek, Sask., were returned as president and vice-president, respectively.

Feature of the annual meeting was the amendment to the constitution providing equal representation on the executive for producers and manufacturers. The latter had previously enjoyed two-thirds representation on the board. The number of voting delegates on the council was reduced from 33 to 15.

Producers named their executive members as follows: P. C. Colquhoun, of Maple Creek, Sask.; Norman Clarke, of Didsbury, Alberta; R. U. Hurford, of Courtney, B.C.; Hector Cullen, of Truro, N.S.; and W. L. Carr, of Huntington, Que.

Manufacturers' representatives on the executive are: Col. C. B. Price, of Montreal; W. H. Forster, of Hamilton; Robert Barbour, of Yorkton, Sask.; J. M. Carruthers, of Winnipeg, and W. F. Mayne, of Toronto.

Appointment of Mr. Fraser to succeed Mr. Stephen will take effect on the latter's 70th birthday, May 23.

## Improving Wheat Section

Scientists Aim To Produce Same Quality From Less Acreage

Not the doubling of the wheat crop, but on the other hand producing the same quantity on half the acreage, and in that manner reducing the cost of production, is the aim of Dr. H. T. Gussow, Dominion botanist, who attended the conference of plant breeders, plant pathologists, and cereal chemists from Ottawa and the western provinces held in Winnipeg.

Dr. Gussow said that while success has not yet achieved, its attainment appears within measurable distance, though several years' further research and experimentation will be needed before this aim can be said definitely to have been reached. Dr. Gussow's interests extend from the Atlantic to the Pacific, and he has assistants all over Canada working on new or improved varieties of different plants. He is now making a tour of the west to inspect the results secured at different points.

## Government Could Not Escape Certain Payments

Bulk Of Expenditures During Last Year Were Unavoidable

This loss (deficit) wasn't because the government was extravagant, says the Ottawa Journal. It was because the bulk of government's expenditures were unavoidable. The government couldn't escape paying \$125,000,000 interest on the national debt. It couldn't escape paying \$50,000,000 for veterans' pensions. It couldn't escape paying to help keep people from starving or freezing. And it couldn't escape paying over \$50,000,000 for deficits of its railways. No matter how much the government's income fell, no matter how it felt or what it tried to do about economizing, these payments, so far as last year was concerned had to go on. They were fixed, unavoidable. Thus nobody is to blame.

## Want More Room

A club all of whose members must be more than six feet tall, has been formed in Bradford, England, to protest against inadequate leg room in theatres and head room in buses and trains.

## Bandit—Now, then, put 'em up quick!

Postmistress (a keen student of American gangster thrillers)—Now that's entirely wrong to start with. You should say "Stick 'em up, baby, and make it snappy!"

Cuba has removed its ban on the exportation of "gigolito and snake skins."

## WOMAN LOSES 28 lbs.

Trips Upstairs Like a 2-Year-Old

A woman writes:—"Three months ago, after much argument, I was persuaded against my will to try Kruschen Salts to reduce my weight, which was 222 lbs. I had tried other things, but all to no avail. After three weeks of Kruschen I had lost 28 lbs. 4 oz., and I felt five years younger. I really must say I feel a different woman. My age is 37 years. I have now lost 28 lbs. in date, and while before, to go upstairs was a great effort, now, as my husband says, I trip up like a two-year-old." (Mrs.) S.O.B.

Kruschen Salts keep the system free from encumbering waste matter. Unless this wastage is regularly expelled it will give rise to rheumatic and other body poisons. And Nature has provided the shortest and surest measure of storing this poison-breeding material out of the way in the form of fatty tissue. Unlike most salts, Kruschen is not merely a laxative. It is a combination of six salts which have a tonic influence upon every organ, gland, nerve and fibre of your body.

## Better Broadcasting Service

Major Murry Compares British and American Systems

Public service broadcasting under remote government control has many advantages over programmes sponsored by advertisers, in the opinion of Major W. E. Gladstone Murray, of the British Broadcasting commission, who addressed the Canadian Club in Montreal.

Comparing United States and British broadcasting, he found the best programmes in the States were equal to the best British broadcasts, but owing to the difficulties to be contended with in the United States, their average programme was not as good as the average British programme.

One of the principal difficulties on this continent was that they did not have, as in the case of the British system, a definite and adequate revenue, leaving them free to consider no interests but those of the listener. The British commission was not tied up in any way with commercial interests, "whereas in the States they have to consider the advertiser all the time." That was his main reason for thinking the public service system was better.

He considered the essentials of a good broadcasting service first, that it should be organized for public service and as a public service; secondly, that priority of entertainment in programmes should be recognized.

He looked forward to development of interchanges of programmes between different parts of the Empire, leading later, perhaps, to international exchanges.

Interchanges of folk-song programmes and such broadcasts as a people would be of great imperial and international value, he said.

## Aviators Would Do Fighting

If World Should Ever Engage In Another War

J. L. Garvin, writing in the London Observer says the youth of Britain never will be asked again to embark by millions as foot soldiers for continental conflict. That method for an island Power would be strategically impossible; happily, it is both economically and politically impossible. Were we involved in another life-and-death struggle we should have to wage it in a very different way. The Air Force would have to be immensely and rapidly expanded. Any future Great War will not be mainly fought at first—or perhaps ever—between pedestrian armies, but a war waged upon civilian populations, bombed regardless of age or sex, with an unexampled mercilessness of promiscuous massacre. Every town, every street, every house, every occupant, will be exposed directly to fate whose wheels were riaked on the last battlefields. An attitude leaning to the Left at an angle of 45 degrees will meet no appreciation. Bombs and poison-gas cannot distinguish between opinions.

## Potato Exports Heavily

Heavy shipments of potatoes from Prince Edward Island are being received at Halifax over the lines of the Canadian National Railways and indicate a strong revival in the export business in this line from the Nova Scotia port. About 300 carloads in all have been booked for export and steamers have been chartered to load full cargoes for southern ports.

## A Good Egg Story

A versatile hen of New Rochelle, New York, laid two eggs, one of which was battiship grey and the other jet black. Then she laid an ordinary white one, much to the relief of Mrs. Michael Circelli, her owner. The white one had a double yolk. The colored eggs are not broken, so the state of their interiors is not known.

## Trade Between Russia and China Is Reported to be Increasing

Edinburgh has an anti-food-waste drive.

## Debate Via Radio

Speakers In Edmonton, Saskatoon and Winnipeg In Consecutive Discourse

The recent radio debate between representatives of the University of Alberta and the University of Manitoba was the first in local history and the third in a series. It was unique in that the public, listening in, heard speakers in Edmonton, Winnipeg and Saskatoon, in consecutive discourses, without a hitch or mechanical difficulty.

Telephone wires connected the three stations; and four times during the broadcast the flow of sound between Edmonton and Winnipeg, and vice versa, had to be changed by reversing the repeaters. This operation, requiring thirty seconds each time, was accomplished so smoothly that the public was unaware of it. And as a flourish of mechanical perfection, the Saskatoon station broadcasted twice, while the Judges were arriving at their decision, which was heard by receivers tuning in on all three studios.

Such types of broadcasting are passing the stage of "stunting," since they reach the public completely and clearly. It is another indication of the remarkable becoming apparent in radio, of a serious and thought-provoking character. Winnipeg Free Press.

## Should Know His Route

Motorman Has Covered Same Ten Miles Over 260,000 Times

William Willis, aged 66, of Oakland, Calif., can claim to be one of the world's greatest globe-trotters, although in the last 44 years he has covered only 10 miles of the earth's surface. His right to a travel record rests on the fact that he has shuffled about 260,000 times that same ten miles more than 200,000 times. He is a motorman and for 44 years he has been on the same route, a distance of five miles from Berkeley to a ferry wharf. His little mileage via trolley car is 2,600,200, a distance equivalent to about 100 times the circuit of the earth at the equator or ten times the distance to the moon.

## An International Preacher

His Church In Canada and Also In United States

With a church in British Columbia and another in Alaska, Rev. Frank H. Bushfield, formerly of Winnipeg, can claim to be working out church unity on an international scale. One congregation worships in the United Church of Canada at Stewart, B.C., and the other, the Methodist Episcopal Church of United States, at Hyder, Alaska. Mr. Bushfield belongs to the Prince Rupert Presbytery of the United Church. He is a graduate of Victoria College, Toronto, and has served in Alberta and Vancouver.

## Bear Rugs Are Cheap

Some Selling At The Pas For Only Ten Dollars

Fur rugs for floor covering are coming back into style as the result of low prices for skins. Making of bear rugs and the mounting of heads and paws and claws has developed into quite an industry at The Pas. Little white bear rugs, a novelty of the Churchill country, sell as low as \$10. Little black bear rugs may be had for even less. A nice big polar bear rug is worth \$75. Black timber wolves run up to \$20.

## Lindbergh Tests New Beam

Closed in under the hood of a Department of Commerce plane, Colonel Charles A. Lindbergh made two "blind" landings at Newark Metropolitan Airport in a test of the new "beamed" beam initiated by the department to help pilots in fog or storm.

No one food has more value for the brain than any other, though fish have been called a brain food.

Sour milk will remove iron rust from white goods.

## Tough On The Eskimo

Blame For Starting Jazz Is Placed On Them

Jazz originated with the Eskimos, though as that seems on the Eskimo. But the description of an igloo-party—"dancing and music"—which finds its way from Corporal Nichols, of the Royal Canadian Mounted Police, into the annual report of that force would seem to leave no doubt as to where the weird noises, the barbaric posturings and the general cacophony of jazz came from. Away up in Baker Lake, Corporal Nichols became the house guest of Neukutt, the local mogul. In his honor Neukutt put on a party, the chief feature of which was the "drum dance." This is the picture the Corporal paints:

"All hands gathered together in the main igloo, the men sitting in the snow bank, whilst the women sat in a circle on the floor." The drum, says the Corporal, consisting of a caribou skin, scraped and cleaned, and stretched tightly across a hoop. It was oval-shaped and about five feet in diameter, with a handle at the base. How to manipulate the drum would require a thesis from a technocrat. It is held by the handle in the left hand, with the arm outstretched and the handle in line with the shoulder. The skin is then struck with a short stick, first on one side and then on the other. At every beat, the drum is turned while the drummer imitates which ever animal the song is sung about. (While all this is going on the women all sing together, with the men joining in the chorus.) And now for the jazz complex. The Corporal says:

"The song of the musk-ox is accompanied by a stealthy musk-ox-like walk by the drummer, with frequent grunts and head tossings. It seems that all songs have about ten verses each, of about six lines, the verses being followed by a chorus. This chorus is apparently the same for all songs, and consists of a series of yah-yah-yahs."

## Helps With Inventions

Wife Of Noted Inventor Gives Him Valuable Assistance

Mrs. Alice Mary Herbert Russell Brown, who announces in the "London Gazette" that she intends to assume the Christian names of her husband, Mr. Sydney George Brown, F.R.S., instead of her own, is a most able lady, who has taken a leading part in developing her husband's amazing electrical and gyroscopic inventions. These have won him many distinctions. He is one of the greatest and most prolific inventors of modern times. By means of one of his inventions the Flying Corps first received wireless messages on airships and aeroplanes and his gyroscopic compass is one of the most interesting marine devices of the age.

## Work Never Kills

It is not work that kills men; it is worry, says Henry Ward Beecher. Work is healthy; you can hardly put more upon a man than he can bear. Worry is rust upon the blade. It is not the revolution that destroys the machinery, but the friction.

## Research Director Presents Many Striking Statistics To Indicate Upward Swing Of Wheat Prices

If history is to repeat itself, the all-time "low" in the price of wheat and probably of the general commodity price level has been reached.

This was the contention of Major H. G. L. Strange, director of the research department of the Searle Grain Co., Ltd., Winnipeg, who recently addressed a meeting of the general membership of the Regina Board of Trade.

Major Strange presented many striking statistics to indicate wheat should climb to 67 cents at country elevators as the surplus disappears. Major Strange based his contention of the all-time price level having been reached on the fact that what is occurring today occurred following years of other years, and also of the report that the index number of wholesale prices rose from 83.6 in February to 84.4 in March, according to a statement issued by the Dominion Bureau of Statistics.

Displaying a chart showing 500 years of wheat prices, collected by George Brownhill, eminent wheat statistician of Liverpool, England, the speaker said it could be noticed the price of wheat was ever fluctuating as it marched through time, but at three periods from 1400 to the present, the price fluctuated very violently, both up and down, in periods corresponding to the three great world-wide wars—the 30 years' war in Germany, the Napoleonic wars and the recent World War—each of them over 100 years apart.

The length of time these fluctuations have been taken to rise and fall have been substantially the same during each of the three wars. From the high price of wheat in the 30 years' war in Germany to the bottom of the decline was 11 years, in the Napoleonic wars it was 10 and one-half years, and in the autumn of 1931, the eleventh year after the high price of wheat in the Great War, the decline was arrested in British sterling at Liverpool, the speaker said.

The price of wheat will rise at the country elevators to three cents as the pound and dollar come closer together, Major Strange continued, adding that 10 cents should be the general commodity price level rise back up to the pre-war level. It would also rise to the extent of the additional 20 cents a bushel, bringing the price at the country elevator of 67 cents, should the surplus entirely disappear, the speaker claimed.

"I do not hesitate to say," Major Strange commented, "that all the economic forces that implement themselves upon wheat are tending to push back the price to the 1913-14 level, but perhaps not higher."

Some of the "fallacies" people within the trade have felt obliged to oppose, the speaker said, were such as the wheat board, an excise tax on wheat, for making bread in Canada, and other proposals to replace the present methods of handling and marketing grain in the Dominion.

"The futures system of marketing has been, and is being, violently attacked by those who favor a wheat board," the speaker continued, adding, "they carefully refrain, however, from explaining what a wheat board could do that the present system is not already doing. They speak vaguely of differentiating between returning the world's price of wheat and returning the world's value of wheat. A distinction absolutely impossible to define, because they are one and the same thing as far as money is concerned."

Some stated the futures system of marketing had no interest in discovering new markets and that perhaps a wheat board or some other organization could do this, Major Strange continued.

"The fact is today that there are literally hundreds of men working over possible wheat market in the world to dispose of Canadian grain," the speaker said, "all experienced men, who are continually extolling the virtues of Canadian grain and endeavoring to promote its use."

"Much has been said about untapped markets for wheat in China. This again is a fallacy," the speaker maintained. "The true facts are that China produces on the average twice as much wheat per year as does Canada, and in addition, four times the volume of rice that we do wheat in Canada, and that 430,000,000 people in China consume more cereals in the form of rice and wheat per head than do the people of Canada, so it is apparent there is not much evidence of starving millions and of unlimited markets. As a matter of fact, people in China are as well fed as we are. Starvation only occurs in certain districts with no communication, that suffer from drought and occasional great floods."

"It is often forgotten that wheat and other commodities can only be purchased by the people of a country in proportion that others are willing to purchase in turn their products or the goods they manufacture," Major Strange added. "The Chinese market for our wheat and other goods will expand as we or the other people

in the world are willing to purchase Chinese products and goods. Money as such, hardly enters into the question at all."

Reduction of wheat acreage by exporting countries by common agreement, would make European buyers suspicious, Major Strange contended, and they would tend to increase their own acreage and retain the tariffs and wheat quotas now existing.

### A Chinese Landlord

**Cancelled Payment Of Back Rent Owed By Unemployed Man**

Somewhere in the city of Halifax there is a Chinese landlord with more "heart" than some of the English members of the rent-collecting fraternity.

In the northwest end of the city there is a family, the head of which has been out of work for a considerable period of time, with the result that they are now long on accounts and short of cash.

They live in a flat rented to them by the Oriental Landlord, who, along with other creditors, has been waiting for his money for several months. He called several times for the money and noted that each time the condition of the family seemed to be getting worse.

He called again recently and handed the tenant an envelope. The father of the family took it with a sinking heart, expecting, on opening it, to find a notice of eviction, which would throw him and his loved ones out on the street.

After the departure of his Chinese landlord he plucked up courage enough to open the envelope to discover to his joy that it contained, not an eviction notice, but a receipted bill for the total of his back rent, amounting to more than \$150, wiping off the debt in its entirety.

Needless to say, any feelings of animosity that this particular family might have entertained toward the yellow race was eradicated by this act of unselfish kindness.

## Riding Bicycles For Science

Physiologists Of Connecticut College Study Effects Of Exercise

Juvenile cyclists of Middletown, Connecticut, are pedalling somewhat breathlessly for an hour. Physiologists of Wesleyan University find that the thrust of young legs—on a "gadget bike" experimentally named the ergobike, which doesn't get anywhere—is pushing forward their understanding of the effects of exercise.

After school, the youngsters come into the laboratory. The dewheeled, stationary bicycle, is electrically equipped so that the drag on the pedals may be increased as the current is stepped up and measured with precision to determine the muscular energy expended. Mounting the seat, the boy straps on a mouthpiece, through which every lungful of air is collected in bags and later analyzed, to find how much oxygen has been used, how much carbon dioxide thrown off.

Stripped to the waist, the perspiring, grinning young gladiator keeps the pedals turning in time to a metronome, ticking 80 to the minute. Meanwhile a laboratory aide follows his rising heart-beat with a stethoscope. Another takes the energy-out readings, in foot-pounds (unit of energy, which would raise one pound one foot). The results are analyzed to probe the effect of exercise on the heart and lungs of the pre-adolescent.

The competitive instinct is a big help in this research. Toward the end of a 10-minute test, Johnny may be puffing loudly, but when informed that Billie carried the same load for 12 minutes yesterday, he hunches over the handle-bars and follows the heart, strenuous with determination.

"The boys are carefully guarded against over-exertion and have plenty of rest between tests. While off duty they amuse themselves looking through microscopes or grilling the men of science."

## Higher Gold Premium Urged

Otherwise Canada Is Likely To Lose New Mining Capital

Fear that Canada might lose out in the competition for new mining capital was expressed by Richard Pearce editor of The Northern Miner, in addressing the Canadian Institute of Mining and Metallurgy at Toronto.

"What I do fear is that Canada, which pays the smallest premium for gold of any of the Empire countries, may lose out in the competition for new capital. Future developments in gold mining must compete for capital for their development. Capital was prone to go to the countries where the profit possibilities were most attractive. Australia, whose gold output had increased 50 per cent, had not hesitated to advertise that 'no one part of the Empire enjoys any such valuable protection' and that the peculiar attractions to gold investments in other parts of the Empire could not compare with those offered by Australia where gold recently sold for approximately \$25 an ounce."

"London's wide interest in South African, Australian and Indian gold shares and its small interest in Canadian might well be traced in part to disparity in exchange profits," Mr. Pearce declared.

He thought the move to have the Canadian dollar equalized with the pound sterling might well be considered in order to gain the advantage of the larger discount. Canadian gold sales must compete for capital for their development. Capital was prone to go to the countries where the profit possibilities were most attractive. Australia, whose gold output had increased 50 per cent, had not hesitated to advertise that 'no one part of the Empire enjoys any such valuable protection' and that the peculiar attractions to gold investments in other parts of the Empire could not compare with those offered by Australia where gold recently sold for approximately \$25 an ounce."

## BARRED SHAFTS OF WIT LOST G. B. S. ADMIRERS

THE RAPID-LIKE WIT FOR WHICH HE IS FAMOUS WAS THE CAUSE OF LOING GEORGE BERNARD SHAW, CELEBRATED AUTHOR AND DRAMATIST, TWO OF HIS MOST ARDENT ADMIRERS DURING HIS RECENT VISIT TO HOLLYWOOD. EN ROUTE TO SAN PEDRO, SHAW STOPPED OFF AT THE MOVIE CAPITAL TO SEE AT FIRST HAND HOW THE GREAT INDUSTRY IS OPERATED. DURING A TOUR OF THE SETS HE WAS INTRODUCED TO A NUMBER OF FAMOUS FILM STARS, AND IT WAS AT THESE INTRODUCTIONS THAT G.B.S. GAVE HIS WELL-KNOWN WIT THE WORK-OUT THAT LOST HIM TWO NOTABLE FANS. FIRST, THE VICTOR BLUNTLY INQUIRED OF ALICE BRADY "WHY A GIRL WITH A NICE FACE LIKE YOURS WEARS A HAT LIKE THAT." THAT PLACED MISS BRADY AMONG THE ANTI-SHAWIANS, FOR WHILE A WOMAN WILL FORGIVE MANY THINGS, CRITICISM OF HER CLOTHES—HER HAT IN PARTICULAR—IS NOT ONE OF THEM. SHAW LOOSED HIS NEXT BARB WHEN LOVEY ANN HARDING WAS INTRODUCED. MISS HARDING REMARKED THAT SHE WAS SOON TO PLAY IN ONE OF SHAW'S PLAYS—"CAPTAIN BRUSHBOON'S CONFESSION." WHEREUPON SHAW INQUIRED WHERE SHE HAD PLAYED THE PART PREVIOUSLY. MISS HARDING SAID "A LITTLE TOWN NEAR PHILADELPHIA," AND WAS AT ONCE THAT THE DRAMATIST ANNOUNCED: "I'M SURE IT MUST BE A PIRATEL PERFORMANCE"—AND AS A PIRATEL PERFORMANCE IS THE PRODUCTION OF A PLAY WITHOUT PAYMENT TO, OR PERMISSION OF THE AUTHOR, MISS HARDING RETIRED TO HER ROOM IN TEARS.

The rapid-like wit for which he is famous was the cause of loosing George Bernard Shaw, celebrated author and dramatist, two of his most ardent admirers during his recent visit to Hollywood. En route to San Pedro, Shaw stopped off at the movie capital to see at first hand how the great industry is operated. During a tour of the sets he was introduced to a number of famous film stars, and it was at these introductions that G.B.S. gave his well-known wit the work-out that lost him two notable fans. First, the victor bluntly inquired of Alice Brady "why a girl with a nice face like yours wears a hat like that." That placed Miss Brady among the anti-Shawians, for while a woman will forgive many things, criticism of her clothes—her hat in particular—is not one of them. Shaw loosed his next barb when Lovey Ann Harding was introduced. Miss Harding remarked that she was soon to play in one of Shaw's plays—"Captain Brushboon's Confession." Whereupon Shaw inquired where she had played the part previously. Miss Harding said "a little town near Philadelphia," and was at once that the dramatist announced: "I'm sure it must be a pirate performance"—and as a pirate performance is the production of a play without payment to, or permission of the author, Miss Harding retired to her room in tears.

## World's Seaplane Record

Italian Aviator Makes An Average Of Over 436 Miles Per Hour

"Red Bull," powerful little speed plane painted entirely red, broke the world's seaplane speed record recently with Francesco Agello at the controls. For five laps over Lake Garda, Italy, Agello made an average of 426.5 miles an hour.

Previous record, set by Lieutenant George H. Stainforth, of England, in 1931, was 408.8. Agello reached a maximum speed of 432.3 on his fourth lap, and his minimum was 421.6 in the third lap. Air officers said a new engine would be installed in an attempt to reach a speed of 700 kilometres, or 437.5 miles.

Agello was a member of the Italian Schneider cup team in 1929. His successful attempt climaxed a series of such efforts at the high speed airport here in which several craft were lost.

## Last Lord Marcher Dead

Was Only Holder Of That Title In United Kingdom

Sir Martine Lloyd, head of the old, Welsh family of direct descent, died at the royal houses of both England and Wales, died April 4, aged 81. He was the only Lord Marcher in the United Kingdom, Henry VIII, having destroyed the titles of every other Lord Marcher. He exercised his rights right up until the present time, having appointed annually, under his hand and seal, the Mayor of Newport, Penn., in the Barony of James. Owning more than 100,000 acres in four different countries, Sir Martine was perhaps the most popular landowner in Wales.

"Walter, would you be kind enough to ask the Manager to send a smaller fender? My husband wants to complain of the food."

Demand for automobiles in Argentina in January was greater than the supply.

A spendthrift is one who spends his money. A tightwad is one who saves it for somebody else to spend.

The Detroit Free Press says England is reported to be sinking at the rate of nine inches every hundred years, which should be discouraging to those who thought Britannia was sunk in 1931.

People of Vienna, Austria, are eating less food per person than a year ago.

Benzol, an anti-knock for gasoline, is present in the waste gas of Turner Valley.

## Checked Up On Doctor

Boy In Montreal Hospital Proved Fallacy Of Old Speech

Royal Victoria Hospital in Montreal, claims to have found the original of "the child who notices things." His name is George Ross, aged ten. George arrived at the hospital to undergo a slight operation. Before the anesthetic was administered, the doctor in charge made his usual little speech to the patient, assuring him that there would be no pain and that the whole affair would be matter of a minute.

George's first remark on coming out of the ether was directed in a reproachful tone to the doctor: "It was seven and a half minutes," he declared. A clock near the bed which George had studied last thing in and first thing out enabled him to check the doctor's veracity.

## Good Business For Germany

Supplies Horse Meat To Paris Where It Is Delicacy

Germany has one method of paying her war debt to France—that is in horseflesh. Horse meat is a Parisian delicacy no less than frogs' legs, and last year according to official municipal statistics, 31,913 horses went under the butcher's axe. Turned into chops and steaks, they are sold in "boucheries chevalines," horse butcher shops with a horse head as a shop sign. Many of the horses that are roasted for Parisian gourmets are animals that have outlived their usefulness in the shafts of cabs on the other side of the Rhine. French doctors say that prejudice against horse meat is unjustified. It has splendid medicinal qualities and is especially valuable for anemic persons.

An eminent banker says the way to end the depression is to eliminate fear. And an easy way to end fear would be to eliminate the depression.

A spendthrift is one who spends his money. A tightwad is one who saves it for somebody else to spend.

## A New Process For Sprouting Grain To Turn It Quickly Into Fresh Fodder For Cattle

Watching For Contraband Shipments Of Munitions

Close Check Ordered On Ships From B.C. To Orient

Customs officials at British Columbia seaports have been ordered to make a close check for contraband shipments to the Orient during the next few weeks. Hostilities in Jehol and the prospect of prolonged fighting have increased the demand for war materials, and it is suspected that munitions have been sent across the Pacific in the guise of ordinary merchandise.

There is a good deal of smuggling going on, according to investigators. Five hundred rounds of ammunition were recently discovered on the liner "Empress of Japan." This was shipped in boxes labelled with a bogus description and would have passed through undetected had it not been for the customs officials' special vigilance.

Of course, there is no embargo on war materials leaving the country, provided they have been purchased in a legitimate way and all other legal precedents have been observed. For instance, the Japanese government recently completed purchase of a large quantity of steel track which has been lying idle at Port Mann ever

**OFF COLOUR? HOW IS YOUR LIVER?**

Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to do its daily two pounds of liquid bile into your bowels. You don't completely correct such a condition by taking pills, oil, mineral water, laxative or anything else, or anything. When they're forced, your bowels are in trouble —and you need a liver stimulant.

Carton's Little Liver Pile will soon bring back the machine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Better medicine. 25c. at all drug stores.

**FOR SALE**

900 acre farm on Blindman River; 6 miles south east of Bentley for sale at \$10.00 per acre. C. Mott, Blackfalds.

**AT THE AVOLON**

"Evenings For Sale"

This romantic comedy from the Paramount Studio, set to music by Johann Strauss, takes place in modern Vienna against the background of nouveau riche commoners and impoverished noblemen who now have to work for a living. It is said to have the deft touch and sparkling romance of Lubitch picture, as well as drama that carries the story forward swiftly. The presence of Charlie Ruggles, Mary Boland and George Barbier in the cast provides high moments of comedy.

The story, briefly, concerns an impoverished nobleman who finds himself at the end of his tether, penniless and without hope. Through a chance meeting with a beautiful girl, he desires to live is revitalized. He accepts an ignominious position in one of the city's gay cafes, only to be discovered and insulted by the girl, who is the daughter of a gut-rich commoner. Backed by the warm sympathy and admiration of an American woman, the man eventually regains his wealth and courage, and a reconciliation with the masked beauty of the carnival is effected.

Coming Janet Gaynor and Charles Farrell in "The First Year", May 11, 12, 13.

Edmund Lowe in "The Devil is Driving", May 18, 19, 20.

Show starts Thursday and Friday 8:30; Saturday 7:30 and 9.

Thursday, 8 p.m. Prayer and Praise Service.

**EVERYBODY SHOCKED!**

Although it was just another one of those apparently unavoidable happenings over which one sometimes has no control, the Rev. T. H. Chapman desires to take this opportunity of expressing to the general public his deep regret of the fact that the films for this week's programme failed to arrive as guaranteed by the firm who supply them. It seems to be rather an amusing coincidence that the title of the feature for this week should have been "The Shock". Well, everybody who was looking forward to seeing this picture has been most shockingly disappointed, and the writer has every good reason to believe that the firm who supply the films will be shocked into greater watchfulness and carefulness in the future, when they receive a certain very carefully worded Night Lettergram. Until further notice these special Motion Picture Programmes will be put on every two weeks instead of weekly, the next one being shown at 8 p.m. on Tuesday, May 16th. And, owing to the fact that too many nickels and one-cent

The regular monthly meeting of Lord Lascelles Chapter I.O.D.E. will be held at the home of Mrs. P. W. Pratt on Monday evening.

MAN KILLS WIFE, WOUNDS DAUGHTER THEN ENDS HIS OWN LIFE

Viking, Alta., May 1.—Slashing with a pocket knife, Thomas Harray, 45, farmer of Phillips, seven miles east of Viking, fatally injured his wife, Miriam, 45, Sunday night, by cutting her throat, stabbed his daughter, Lillian 18, above the heart, and then ended his own life during the night by cutting his throat after he had tried to board a freight train and had fallen and broken his leg.

Lillian is in the Viking Hospital with a fair chance of recovery. Mrs. Harray died an hour after her husband's attack. The Harrays have been residents near Phillips for several years. A family quarrel is believed to have been the cause of the tragedy. Latest reports from Viking state that Lillian Harray who is in Viking Hospital suffering from a stab wound over the heart is still in a critical condition.

**LACOMBE RED LABEL BEEF SHOW and SALE**  
Exhibition Grounds, Lacombe  
July 4th and 5th, 1933

**CLASSES**

Boy's and Girls under 20 years . . . . . 700 lbs. to 900 lbs.  
Senior . . . . . 900 lbs. to 1100 lbs.  
Boy's and Girl's class require to be fed and cared for by exhibitor at least two months prior to Sale

CONDUCTED BY THE LACOMBE AGRICULTURAL Society

Entries will be received up to June 1st for single animals or car load lots.

Apply to the Secretary for Entry Forms  
S. J. HENDERSON D. F. CHISHOLM,  
Chairman of Committee Secretary  
C. F. DAMRON, Auctioneer

**CAR POLISHING**

Get your car polished the new Electrical way. One polishing will last a whole season. This new method restores the original brilliance to the paint on your car and makes it look like new. For a period of two weeks I am doing this work at a greatly reduced price, so get your car polished soon. Pete Swanson.

**FOR SALE OR EXCHANGE**

Legacy oats, new early, high yielding variety, 50 cents a bushel, or one bushel for three bushels of feed oats of fair weight. Apply Experimental Station.

**TEAM WORK WANTED**

If you want your garden plowed right, your ashes hauled away, or any other team work done, it will be to your interests to see Lloyd Hoppus. His prices are moderate and his work is guaranteed satisfactory.

**TENDERS FOR COAL**

Sealed Tenders addressed to the undersigned and endorsed "Tenders for Coal, will be received until 12 o'clock noon (daylight saving), Monday May 22, 1933, for the supply of coal for the Dominion Buildings and Experimental Farms and Stations, throughout the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia.

Forms of tender with specifications and conditions attached can be obtained from H. F. Dawson, Acting Chief Purchasing Agent, Department of Public Works, Ottawa; H. E. Matthews, District Resident Architect, Winnipeg, Man.; G. J. Stephenson, District Resident Architect, Regina, Sask.; Chas. Sellens, District Resident Architect, Calgary, Alta.; and C. F. Dawson, District Resident Architect, Victoria, B.C.

Tenders will not be considered unless made on the forms supplied by the Department and in accordance with departmental specifications and conditions.

The right to demand from the successful tenderer a deposit, not exceeding 10 per cent. of the amount of the tender, to secure the proper fulfillment of the contract, is reserved.

By order,  
N. DESJARDINS, Secretary.

Department of Public Works  
Ottawa, April 21, 1933

**FOR SALE OR TRADE**

Ten fresh milk cows for fat cattle or barley. McKenzie Bros.

### THE LONG VIEW PAYS

Experience proves that it pays to look ahead and make provision for unknown future needs when one is able. Regular deposits in a Savings Account soon accumulate. The money is always ready for use, and it never depreciates in value.

WORLD HAPPENINGS  
BRIEFLY TOLD

The Salta Observatory reported that volcanoes in the central Chilean mountain region were moderately active, with indications of intense activity in the near future.

Prof. Albert Einstein, who renounced his German citizenship because of anti-semitism in Germany, has accepted an invitation to become a member of the faculty of University of Madrid.

The French naval air force was ordered to help maintain order along the frontier of Djibouti territory in French Somaliland, Africa, where several rebellious Abyssinian tribes threatened trouble.

The honor of being the first woman professor in Scotland has fallen on Miss Cecilia J. MacTaggart, of Glasgow, who has just been appointed to the chair of Biology in the Anderson College of Medicine, Glasgow.

Calgary school board will take court action against parents who keep their children from attending school in protest against the city reverting to the summer unemployment relief schedule.

Wyoming has lost a titled ranchman and England has gained an actor. Oliver Henry Wallop, 72, renounced his allegiance to the United States, placed his chape in mothballs and became the Earl of Portsmouth, the 9th ranking peer of England.

Alberta will have only two district courts if an amendment to the Districts Courts Act, submitted to the legislature, is approved. At present, there is a district court in each of the 16 judicial districts of the province.

Poultry raisers in Western Canada are finding a market for their products in Great Britain. In the last two months of 1932, 1,500,000 pounds of fresh Saskatchewan and Manitoba turkeys were shipped to British markets.

Arthur Bierwag, of Stettin, Alberta, has been awarded the Elizabeth Empress memorial scholarship for 1933 at the University of Alberta. This entitles the holder to journey to Geneva for a summer course at the Zimmer School of International Affairs.

Depression Has Hit  
Court Interpreters

Lack of Foreign Weddings in Montreal Affects Their Income  
Interpreters in the recorder's court at Montreal, are blaming a lack of weddings in Montreal's foreign colony for their reduced earnings lately. There was a time when weddings and the celebrations following them were numerous and quite often those who celebrated too much found themselves explaining the reason for their actions in court. It was a poor day when that did not bring forth five or six cases for the interpreter to take part in, and, of course, the more cases the larger his income. Now many people are out of work and cannot afford to get married. Those who do, fail to celebrate, making appearances in court rare, complained one man who had earned only \$6 in one week.

## A Cold Summer

Prediction That the Sun Will Show Less Heat For the Next Two Years

A prediction the sun will be colder for the next two years, with the possibility the earth will be affected in a way as yet unknown, was issued by Dr. Charles G. Abbot, secretary of the Smithsonian Institution.

Dr. Abbot already has had some success as a predictor of the sun's "weather." In 1930 he forecast two warm years on the sun, which in general has been fulfilled. Measurements have shown the sun has been giving out considerably more heat than normal since then.

Dr. Abbot's prediction is based on long study of periodical rises and falls in the sun's heat.

## Prince Is Honorary Bill Poster

Honorary positions are commonplace to the Prince of Wales, but what is no doubt the queerest, has just come to light at Melbourne, Australia. It is that of a bill poster. When the Prince was there in 1929 he made complimentary references to a number of posters he saw. To mark appreciation of this the Bill Posters' Union elected him a life member. His chief connection with the union is in the exchange of Christmas greetings.

## A Notable Achievement

Nineteen of twenty-one murders committed within the precincts of Greater London were solved by the metropolitan police last year. This is a record of which the authorities may well be proud. Politics and slack court procedure are things that do not enter into the question of justice in the Old Country. Hence this notable achievement.

Czechoslovakia has placed taxes on radio tubes and electric light bulbs.

Planes of the Royal Dutch Air Lines flew 1,919,505 miles last year.

W. N. U. 1930

## Chose the Better Way

Hospital in India Fitting Memorial For Late Sir William Wanless

Sir William Wanless, considered to have been the most famous surgeon in India, is dead in California. Native Canadian, he went to India years ago under the auspices of the Presbyterian church over the plains, the most famous and picturesque survivor of an era whose romance is an epic of the Canadian story. As public man, administrator and parliamentarian, he was best known to the public, but fiercer than that career, notable though it was, and useful, was the personality of the man himself; a life rich in color and brave adventure, a character which made and held friends, which to those who knew him best, was something to cherish. Great justice he was, loving the storm of battle, but behind the tempestuous warrior was a heart of gold, the warm emotional being of a Christian gentleman who loved his kind and who loved Canada and above all those Western prairies of whose soil he was so racy. Throughout his stirring life he had his share of adversity, but he took the blows of fate with fortitude, as part of the life which for him was to be lived dangerously. One thinks of him that in his last moments he turned to that Western land of which he was so much—

He had not been in India long before the people turned toward him. He was as much a missionary as a surgeon. Those who were wealthy came, and it is said that Sir William could have made himself rich in his profession.

It is recorded that he retained only his salary as a missionary, turning over his fees to build a 250-bed hospital, also a medical school and five outpost stations. More than that he maintained the staff of 125 working in the hospital, paying their salaries, and due to his efforts there was brought into existence, a leper sanatorium and a tubercular hospital in the vicinity.

Had this man of God been concerned about building his private fortune he could have done so. He could have weeded out the needy folk who paid him nothing; he could have allowed the lepers to continue standing to one side, victims of a living death. He could have so chartered his course that he might have retired immensely wealthy, and with his retirement his work would have ceased.

Sir William chose the better way. Today the doors of the simple hospital are open; the work of caring for sick folk goes on in the days of his strength he used his powers to create something which would live long after his skill and direction had been removed.

It makes good reading; there is much that is entirely wholesome about the outlook and conservation of such a man. This country would be rich indeed if it could keep on producing men of similar vision.—St. Thomas Times-Journal.

## CHARMING DAY WEAR IN JUMPER MODEL-AFFECTS PRINCESS LINES

Loveliness for daughter or for mother.  
Jumper dresses are so smart! Of course you'll want this princess model, so youthfully charming.

It's carried out in navy blue crinkly crepe silk. The gimples are maize plaided organdie. It's cunning the way it buttons down the back with tiny yellow ball buttons.

Pin tucks make the waistline fitting of the jumper. And incidentally, the jumper is a one-piece affair. Made in a jiffy!

A printed crepe silk would be effective for the jumper with the gimples of plain toning crepe.

Style No. 554 is designed in sizes 14, 16, 18, 20, 22, 24, 26, 28 and 30 inches bust.

Size 16 requires 2 1/2 yards 35 or 38-inch, with 1 1/2 yards 39-inch for blouse.

Price of pattern 20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

## A Legendary Character

Canada Will Not Soon Forget Frank Oliver

Long after he is gone legends will cluster around the memory of Frank Oliver. For he was the Western pioneer incarnate, the embodiment of all that gallant courage which won conquest over the plains, the most famous and picturesque survivor of an era whose romance is an epic of the Canadian story. As public man, administrator and parliamentarian, he was best known to the public, but fiercer than that career, notable though it was, and useful, was the personality of the man himself; a life rich in color and brave adventure, a character which made and held friends, which to those who knew him best, was something to cherish. Great justice he was, loving the storm of battle, but behind the tempestuous warrior was a heart of gold, the warm emotional being of a Christian gentleman who loved his kind and who loved Canada and above all those Western prairies of whose soil he was so racy. Throughout his stirring life he had his share of adversity, but he took the blows of fate with fortitude, as part of the life which for him was to be lived dangerously. One thinks of him that in his last moments he turned to that Western land of which he was so much—

"Under the wide and starry sky,  
Dig the grave and let me lie,  
Glad did I live and gladly die,  
And I laid me down with a will."

—Ottawa Journal.

## Final Pronouncement

Sir Oliver Lodge Writes Of What He Knows Of Things In General

"This book is probably my final pronouncement to the world of what I think of things in general."

Sir Oliver Lodge, the 81-year-old scientist, philosopher, and spiritualist, makes this statement about the book which he has just completed after nine years' patient labor, and which is shortly to be published.

Sir Oliver deals extensively with the question of spiritualism, and explains how he reconciles his belief in the evidence of life after death with his life-long devotion to the cold truths of science.

He also refers to arrangement he has made for communicating after his death with friends he leaves behind. Sir Oliver's secretary told a reporter that the scientist had no intention of giving up his writing. She said:

"His remark regarding his final pronouncement merely means that his philosophical writing. He is still writing hard every day on scientific matters."

## Bart Party Is Latest

Social Event Held Recently In Buffalo Proved a Success

Barting has reached the stage of social function in Buffalo, not merely because adapting amusement to hard times is a fashion of the day, but also because there is fun in novel experiences.

The Currents Event Club, made up of women who hardly are in the omic stage which makes barting necessary, has set the example with a bart party, and the members had such a good time that they voted to make it an annual event. The objects offered for bart were bracelets, necklaces, book ends, preserves, cakes, use of automobiles, offers to sew and mend, orders for gasoline, bridge lessons and a multitude of other things representing the activities of the modern woman.

## Argentine Delicacies

One Called "Palmito" Entails Cutting Down Palm Tree

The visit of the Argentine Mission to London has already had its influence on restaurants. Many are specializing in dishes and delicacies peculiar to South America. One of these is "palmito," an hors-d'oeuvre very popular with the Prince of Wales. He first tasted it in Buenos Aires three years ago. Its preparation entails cutting down a palm tree. The heart is then cut into cubes, soaked in oil, and served with lemon, anchovies, and sliced olives.

## The Correct Expression

A convention of Memphis school teachers has resolved that the expression "It is me," is to be preferred to "It is I," and is good colloquial usage. For our part, on the grounds of both grammar and euphony, we prefer not to change "me" into a first personal pronoun. The Scriptures do not err grammatically, and there the expression is assigned to the Lord. "It is I, be not afraid,"—Victoria Colonist.

Customer: "But you didn't tell me about the mortgage on the house?"  
Owner: "Don't you remember? I told you it had all the modern improvements."

Two British Museum naturalists are making a survey of the animal and plant life of islands in the Gulf of Guinea.

If the devil can find plenty for idle hands to do, a number of our fellow citizens are wondering why the devil he doesn't.

## ON THE SEE-SAW OF DESTINY

The "ups and downs" of life were never better illustrated than by this picture. Chancellor Adolf Hitler, once a humble house-painter and now Dictator of Germany, is shown chatting with former Crown Prince Wilhelm who was in line to rule the country before his father's abdication, and who is now an ordinary citizen. They are pictured at Potsdam just before the opening of the special session of the Reichstag at which Hitler demanded and was granted dictatorial power.

## Disease-Resistant Wheats

Small Quantities Of Seed Are Now Made Available

Highly disease-resistant wheats have now been produced that are perfectly satisfactory from the standpoint of quality and agronomic behavior, the associate committee on field crop diseases announced at the conclusion of its fifth annual meeting in the Dominion Rust Research Laboratory in Winnipeg, Dr. C. H. Goulden, of the laboratory, presented the report.

"It seems that out of 33 strains in the co-operative tests of 1932 at least six are suitable for distribution to farmers, but only small quantities of seed are available at present, and it will take two seasons to increase the quantity available to the required point," the statement read. "In the meantime, commercial milling tests will be made on the strains selected and further field tests, with a view to reducing their number to two or three adapted to the varying conditions to be found in the wheat-growing area."

"Every effort will be made from now on to increase the seed of these wheats as rapidly as possible."

## To Take Precautions

Parts Of Saskatchewan Threatened With Hopper Plague

Early precautions against the outbreak of a grasshopper plague in parts of Saskatchewan are urged upon farmers by officials of the department of agriculture.

Severe outbreaks of the plague are expected in southeastern Saskatchewan in the Rostevan area, comprising a semi-circular tract of land including the towns of Torquay, Hinton, Wilmar, Nottingham and Carnduff. The badly affected area also takes in a longitudinal strip up the centre of the province, starting in the south at Assiniboia and stretching far north in a narrow area to the southern boundary of Saskatchewan. Lesser areas are located at Neldap, Pisgot and Seepre.

England's oldest free church building, the Herringston Congregational Church, which still boasts a thatched roof, recently celebrated its 360th anniversary.

Eli Behnroth, the German airwoman who will fly from Berlin to Arabia.

"Well, what is your trouble?"  
"Ringing noises in my ear, sir."  
"Ah! What is your profession?"  
"Butler, sir."—The Humorist, London.

## Trees Of Old London

More Than 700 Are Growing Within The "Square Mile"

To the casual visitor, or even to the daily worker, the City of London does not commend itself as being too well supplied with trees. And yet more than 700 forest trees may be found today flourishing in the "square mile," remarks the Overseas Mail. The City owes its trees very largely to the churchyards, which number 66. In 54 of them are growing trees varying in number from one to two to the forty odd of St. Giles, Cripplegate, and St. Paul's. In all these churchyards, the plane tree predominates; in fact, 450 of the trees in the City are planes, and almost entirely "London planes" at that. The London plane is considered to owe much of its vigor when growing in smoky places to the fact that its outer bark is covered by a thick, grey, certain amount of space and light it seems to thrive, no matter what the soil is like. An excellent example of this are the tall trees that ring Finsbury Circus. In the sixteenth century this area was merely a rubbish heap.

By the middle of the eighteenth century it was raised to three feet with broken bricks and laid out as a garden. In 1780 it was again raised with broken bricks and rubbish another three or four feet. On this is now growing a ring of plane trees. The tallest plane in the City stands in St. Paul's Churchyard and is 107 feet high. The two finest specimens are, however, the Wood Street plane of St. Peter-at-Chepe, where Wordsworth's "Poor Susan" heard the thrush singing and fell to seeing a vision of green fields in Chesapeake, and the great plane standing on the part of Eastcheap Street that was once the churchyard of St. Michael Basil-Law. The little twisting lanes of old London run winding between huge blocks of offices instead of hedges, and have nothing of the country about them save their names. In Ivy Lane, Love Lane, Rosemary Lane, But as they run now, so they ran before the Great Fire, when perhaps there were apple trees in Sweet Apple Court and lilies blooming in Lillypot Lane.

## Recipes For This Week

(By Betty Barclay)

## CHOCOLATE PRUNE CAKE

2 cups cooked prunes.  
1 1/2 cups granulated sugar.  
1/2 cup shortening.  
2 1-ounce squares bitter chocolate.  
3 eggs.  
2 1/2 cups flour (pastry or cake).  
4 teaspoons baking powder.  
1/2 teaspoon soda.  
1/2 teaspoon salt.  
1 cup milk.  
1 teaspoon vanilla.

Remove pits from prunes and cut prunes into small pieces. Cream sugar with shortening. Melt chocolate over hot water and add to creamed mixture; mix, add well beaten eggs and mix again. Sift flour with baking powder, soda and salt and add alternately with the milk, a small amount at a time. Add prunes and vanilla and beat thoroughly. Pour into three greased cake tins and bake 25 to 30 minutes in a moderate oven (375 degrees Fahrenheit). Put layers together and spread top and sides with chocolate butter frosting.

## ECONOMY MEAT PIE

Cut left-over meat and vegetables into uniform medium-sized pieces. Mix with an equal amount of medium cream sauce (1 cup milk, 2 tablespoons flour, 2 tablespoons butter). Season well with onion, salt, pepper, etc. (Use left-over gravy with cream sauce if possible). Cover with a thick pie crust, biscuit dough, or layer of left-over mashed potato mixed with milk (one slightly beaten egg can be added to potato if desired). Bake in a moderate oven until the crust is cooked, or until browned and heated through if potato is used.

## Protection For 'Planes

Ice Umbrella Will Shield Hub Of The Propeller  
An ice umbrella for propeller hubs, a device said to overcome the last remaining ice peril for aeroplanes, was announced at Cornell University.

This umbrella shields the hub of the propeller.  
The danger is not from the ice on or directly in front of the hub, but the danger is from the ice spreading in both directions outward along the whirling blades.

## Church Not Accepted

Reid Memorial Building In Scotland Still Stands Empty

The most ornate church in Scotland, the Reid Memorial Church in Edinburgh, is still empty, though it has been completed for several years. It was built at a cost of nearly \$250,000 and generously endowed under the will of the late William Reid, a wine merchant, as a memorial to his father, who also was in the wine business. The Church of Scotland has not accepted the building. Reid's sole stipulation in leaving money for the memorial was that the building should be magnificent.

## Has Bullet-Proof Car

Viscount Makoto Saito, Japan's elderly Premier, has bought a large armored American automobile. It is bullet proof against small weapons. The machine, costing \$6,000, is a closed limousine with bullet-proof glass. Threats against the Premier's life have been increasingly frequent. His two predecessors were assassinated by nationalist fanatics.

## Made Success Of Hobby

A striking record was made by Constable Carl F. Waliden, of Stockholm. He recovered 21,000 lost or stolen bicycles in his thirty-two years of service. He has just retired on a pension. Finding missing wheels was a hobby with Waliden.

Japan is now producing more feature-length motion pictures than Hollywood.

Dill, a herb used in making certain pickles, grows wild in some parts of British Columbia.

## Germany's New Religion

Under Hitler Rule Old Testament Would Be Barred

The religion of Germany under Hitler rule as defined by the Protestant Nazi "German Christian Movement," would out the old Testament and would erect in its stead the saga and fairy tales of Germany and the leading personalities from German spiritual, philosophical and artistic life. At their first national convention the members of this movement named a commission to amend German church life in conformity with Nazi ideas and "in a pure Aryan spirit." The Nazi church organization, the "German Christians," are estimated to have one-third of the membership of the Evangelical churches. With their power through the control of the State to cut off the financial support of the church, they are in a position to push through this or any other program to Teutonize Christianity.

## Wheat Exports

New Impetus To Canadian Exports Is Now Expected

The absorption of Southern Hemisphere wheat by importers within a short time is expected to give a new impetus to Canadian exports, according to the report of the statistic department of the board of grain commission, on the movement of wheat. Canadian grain crops for March. However, a drop in estimates of requirements for the season will possibly affect shipments from Canada. The reports follow:

A very slight increase is recorded in the volume of export clearances of Canadian wheat during the month of March, as compared with February. The totals being 15,400,345 bushels and 14,078,837 bushels, respectively. The export demand for Canadian wheat has fully reflected the dullness usual at this time of the year. European importers having abundant supplies of Argentine and Australian wheat arriving. A somewhat large proportion of Argentinian shipments were unsold at time of loading due to shippers having chartered ocean tonnage intended for heavier shipments of maize than wheat during the month of February, the space having to be utilized for wheat instead. As these supplies are absorbed by importers, the export market is expected to show a decided improvement.

Since the issuance of the last report, Mr. Bromhall's revised estimate of important requisites for this season have been received. The new total is 40 million bushels lower—664 instead of 704—and a corresponding reduction is made in the prospective shipments from Canada. The only other changes are an additional eight million bushels to anticipated shipments from Australia and a corresponding reduction of the total from the U.S.A.

## Showed His Gratitude

Lawyer Who Successfully Defended Thief Received Stolen Picture

There was a case in court a while ago in which a man charged with burglary was acquitted by a jury. The mastery way the lawyer for the defence handled the matter impressed the jury, and apparently it impressed the defendant, too. A day or so ago the lawyer (he is an honorable man, don't mistake us) received a package in the mail. It was a painting print, and was accompanied by this note: "Dear Boss, I was doing a job out Forest Hills way the other night and seen this, you might like it."—The New Yorker.

## Sharing Large Houses

Fashion Introduced In London By Duke Of Connaught

In these hard-up times people in London are trying to solve the problem of being saddled with houses too large for them by dividing them into family flats. Instead of young married couples taking small houses in Chelsea or elsewhere, they instal themselves in part of the parental home with separate housekeeping of their own. The idea was started by the Duke of Connaught, who gave Lady Patricia Ramsay, an "apartment" in Clarence House when she married.

## British Are Practical

British shipbuilders have laid before the Government a "three-year plan" that would provide 1,000,000 tons of new ships yearly and give employment to 270,000 men. It is proposed that old shipping be scrapped annually and replaced by new vessels. Practical schemes such as this are better than a thousand theories, and the Briton is nothing if not practical.

"What an appropriate-looking hot-dog stand!"  
"Yes; it's made of dogwood and covered with bark."

Patrick Barry, who has died in Williston, England, was drummer in the local band for 60 years.

One catch of grey mullet landed at Plymouth, England, recently weighed 30 tons.

The first post office in Calgary, Alberta, was opened in 1882.

Copyright by William Byron Mowery

### CHAPTER IX.—Continued.

A little after gray dawn Alan rebuilt the fire, cooked breakfast, and reluctantly awakened his partner.

Later, when they skinned out to the plane, Buzzard glanced at the tanks and remarked tersely:

"I hope your buddy, this Hardcock, has got some gas and oil out to that lake. It'll be our finish if he hasn't."

"Bill will have it there," Alan assured. "He may not be there himself, he's probably on duty; but we agreed exactly where to cache it. It'll be waiting for us."

They climbed in, taxied twice around the lake to warm the sputtering motor, took off and headed north toward Goose Point at Lake En Travers.

With the heavy rains stopped and the insect scourges abating, Alan knew the hazards were on the move again or shortly would be. When they did stir, he wanted to be there on the Big Alouka to look out for Joyce.

Ever since he came to believe that Dave MacMillan knew nothing of the crime, he had been puzzling about that pack of stolen furs. Something dark and sinister lay behind that pack. There was some connection between the trader and those criminals, but what?

Alan reasoned: "Those furs didn't get in that shed by accident. Those men might have had a grudge against Dave MacMillan and planted them there. They might have figured he'd show them to us and get in hot water. That guess is at least possible. If it's true, then their grudge might lead them to strike at Joyce."

If they intended anything against Joyce, they doubtlessly would attempt it just before they started eastward on their trek through the Great Barrens and Strong-Woods. Alan had dreamed of that, dreamed of her being captured and taken along, as the bandits had captured Margaret Fournier.

With Hassell refusing to extend her any protection whatsoever, Alan felt that he and she alone stood between her and a terrible danger. If anything happened to the plane, or to him and Buzzard, . . .

Looking ahead through the propeller disk, he glimpsed the great blue lake of his rendezvous with Bill. A few minutes later on the northern shore he sighted Goose Point reaching out into the sunlit waters of En Travers.

Leaning forward, he pointed out the promontory to Buzzard and shouted into his partner's ear:

"That's the place. Glide down and light, close in as you can. I don't see Bill there, but he probably couldn't get away from duty to wait for us. Our supplies are cached in that red-willow thicket back next to the wood. We'll go ashore and get them."

Buzzard cut off the ignition. The engine roar stopped. As the plane glided down at a mile-long tangent and swept over Goose Point, Alan leaned out into the slip-stream and looked under keel, searching the flag-and-willow headland for a possible sight of Bill Hedcock.

Hardly expecting to meet Bill, he was not surprised when his old part-

ner failed to show up. But as the machine glided silently over the point, his eyes were caught by an object there on the muddy landwash. At a second glance he saw it was a large gasoline drum lying in full view at the very tip of the headland.

The sight of the drum startled him. He queried silently: "Why the devil did Bill put that thing out there as a glaring? He didn't need to draw my attention; we arranged about the cache."

Beyond the point the plane touched the surface, plowed on through a shower of spray and came to a stop three hundred yards off the landwash.

In the scarlet-and-gold police launch, hidden behind a low-sweeping balsam at water edge, Inspector Hassell and Corporal Whipple watched the machine whirr low over the point.

As it came down and landed, Hassell clutched his rifle a little tighter and watched intently.

His heart leaped as the machine touched the wavelets skinned on a little distance, and came to a stop.

"They're going ashore," he breathed excitedly to Whipple, as though unable to believe his incredible luck. "We'll skim out and ram the plane. Get ready!"

Unnervously, Alan stood up in the cockpit and searched the headland with his glasses. Over and over he kept telling himself that it wasn't like Bill's cautious old patrol pattern, to roll that drum of gas out there.

While he was searching the point, he felt Buzzard excitedly grasp his arm.

"Alan! Look! . . . Lord's sake!—look over there!"

Alan whirled and looked where he pointed, at the southern shore of the lake eight miles away.

On a long timbered headland there a sudden sheet of flame had leaped up nearly sixty feet into the air and stood up above the tree tops, with a fiery puff and cloudlet of smoke visible for miles and miles across the open water. A few seconds later the flame died down a little, as though it had been of explosive origin, but a clump of paper birches up which the flame had raced still continued to burn like a gigantic torch.

Focusing on that distant headland, Alan saw nothing except the fire-wrapped birches. As he brought the glasses down, mystified, frowning, his uneasiness shifted from his again, sharp attention. That suspicious drum of gasoline—Bill surely wouldn't have rolled it out there. That huge burst of fire across the lake—it had some meaning.

"Buzzard, something's wrong here! All wrong! I don't like the idea of going ashore here. If something's wrong, you don't know what we might be walking into."

"Well, what're you going to do? We've got seven gallons of gas in the wing tank and five in the emergency, and we can't get far on that!"

"Maybe so, but I'm not walking in to any trap. Somebody's over there where we saw that big gob of fire. I'm suggesting we get into the air again, hop across and have a look-see. That's our best bet. This layout here is all off-color and I know it."

"All right. We'll hop across. But a couple more hours around this landscape, and we'll be rocking on the waves."

From the height of a hundred feet Alan looked ahead through his glasses, scrutinizing that timbered point where the birches were still ablaze.

He started as the glasses picked up a tiny man-figure far away on that headland. Watching he saw it rush out upon the extreme rock tip. With the plane whirling round, he caught the figure in sharper focus—and recognized Bill Hedcock!

Waving his arms, hat and part of a pine tree, Bill was frantically trying to draw their attention.

Alan, leaned forward, cupped his hands and shouted to Buzzard:

"That's Bill! There on the headland. Light and taxi in. He's waving us down, so it must be safe. We'll soon see what the trouble is."

They angled down on the water and skimmed close in ashore. In a canoe Bill came paddling out to meet them.

"I knowed you'd make it, Alan!" he panted, looking with marvelling eyes at Buzzard and the plane. "I knowed you'd show up sometime. The gas and oil—that is, most of it—is right ashore here, ready for you. There's more cached up the Alouka, too. I was scared. . . . When you were afraid you were a goner!"

Hastily introducing a new partner to an old one, Alan demanded: "What'd you mean, Bill? What under heaven are you doing over here? What happened? Man, you're all shot!"

"An half-dead," that muttered. His voice was thick, he could hardly stand up. With the long strain over, a fearful reaction had set in. He looked ready to fall down dead asleep.

"But what happened?" Alan repeated.

"Alan, that Johnny Jump-up caught onto our trick. He was out to bag this air machine and nail you two. And he came skittish close to doing it. Lemme tell it."

"I had those drums cached over there on Goose Point like we arranged, and I was waiting there, never suspecting a thing. One evening . . . My've been four or five days ago, I've—an near lost track of time."

Anyway, I was sitting there in the willows slapping mosquitoes and lit-

bad complexion?  
Ad at once!  
Only a clean  
inside can give  
you a clean skin.  
You need Eno  
every morning.

**TAKE ENO'S FRUIT SALT**

tening to a couple whisky-jacks raise Cain with something back at the timber edge.

"I hadn't nothing much to do, so I sort of moseyed back that way to see what all the fuss was about. When I got up pretty close I all at once smelled tobacco smoke, cigarette smoke. That's a faint whiff, but no mistake about it."

"What the h—!?" says I. "Who's smoking Turkey tobacco around here? It made me leery right away. I followed my nose up-wind and snuck up real careful. There in the first drogue of balsam was a Smokey, that Ogi-Tomax, sitting against a tree, lighting one cigarette on the butt of the last. They were that kind of cigarette that Hassell gets clear from Paris, Alan."

"When he finally got wise to somebody being near, he grabbed for his rifle. But I jumped for him too quick and hit a couple times, and while he was coming out of it I loped that gun of his around a tree. Then I collared him and asked him what the condemnation his intentions might be. At first he closed up like an oyster and wouldn't do nothing but grunt and look sour. I was suspicious of him laying low there watching me, so I up and jammed him—I out of him then and there till he did pry open his jaws."

"Hassell had hired him to shadow me and spy out what I was doing. He must have got help somehow to me taking that gas. And he and that fashworm Whipple were coming there to Goose Point in the launch to get some gas, then lay low and wait for you two when you lit down. Two bits to a shirt button they're over there right now!"

As he thought how close he and Buzzard had come to going ashore and being captured, Alan shuddered.

Bill went on: "When the Smokey told me that, Sky, did I make some tail tracks? I never got such a wiggle on in my life. With the Smokey helping, I made two trips across the lake and snaked the drums all away—all except one drum when I heard the launch coming and didn't have time to take them."

"It's still over there," Alan interrupted. "They rolled it out in plain sight like a decoy, but instead of that it made me suspicious. They overplayed. But what got you all set this way, Bill?"

(To Be Continued.)

### Would Use Wheat

**Urges Use Of Surplus Grain For Making Industrial Alcohol**

Action by the Department of Agriculture with a view to the use of surplus grain, principally wheat, for the manufacture of industrial alcohol was urged in the House of Commons.

The department, said G. G. Coote, (U.F.A., Macleod), when pressing the matter introduced at Washington, asserted Mr. Coote. The U.F.A. member read an editorial estimating the use of surplus wheat for manufacturing industrial alcohol would raise the price of wheat about 10 cents per bushel. Refuse from the grain used for manufacturing industrial alcohol could be used for feeding purposes for cattle, Mr. Coote said.

Proposal was made during consideration of estimates of the department of agriculture.

We aren't very well up on these new theories, but we feel strongly that one of the chief troubles with the price system is not having the price.

Some of the stunted trees in the "Barren Lands" of Canada are fully 200 years old.

Silk yarn exported from America by Argentina last year weighed 84,514 pounds.

### YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bill

—No Calomel needed

When you feel hot, depressed, sour on the face, or when you are constipated, it is daily two pounds of liquid bile into your bowels.

Diets and stimulants are being advised to make you feel better. But the only way to make you feel better is to get your liver working.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

It is the liver that makes you feel better. It is the liver that makes you feel better. It is the liver that makes you feel better.

### Trot in Prairie Streams

**Big Loch Leven Trout Caught in Cypress Hills Area**

Bigger than the biggest Loch Leven trout previously known to have been taken in Canada, one of these fish weighing 10 pounds 2 ounces was recently caught in the Cypress Hills area of Saskatchewan.

The fish was a "whopper" but what makes the case particularly noteworthy is the fact that this big fellow was caught in a part of the country where there were no trout at all until the Loch Leven species were introduced there by the Dominion Department of Fisheries prior to the transfer of Saskatchewan fisheries administration to provincial control several years ago. It's another striking proof of the effectiveness of intelligent fish culture.

For the most part the Dominion Department's fish cultural work is in connection with efforts to maintain and increase the country's stocks of commercial fish, but attention is also given to the enlargement of angling resources, with a view both to widening the recreational opportunities of Canadian citizens and adding to the attractions offered the tourist.

The Cypress Hills case is particularly noteworthy in which sport fish have been successfully introduced by the department in sections of the country where nature had overlooked this particular endowment.

So far as the introduction of Loch Leven trout in the Cypress Hills area is concerned, the Fish Culture Branch of the Fisheries Department made its first "planting" in 1924 when fingerlings from the hatchery at Banff were set free in Frenchman's River. Other plantings were made in 1925, 1926, and 1927. All told, about 376,000 fry and fingerlings were put into the river and as it has a number of tributaries the young fish made their way to different waters in the district.

They thrived, too, for while the 10-pounder is the biggest so far caught, other trout taken by anglers in this area in recent summers have been of good size. Incidentally, it may be noted that a 10-pound fish is several times as large as the average Loch Leven trout taken in Scotland, the original home of this species of fish.

### Making Butter Go Farther

**"Spreadability" Issue Being Studied By New Zealand Dairymen**

A new element is expected in butter. It is not sufficient that it shall be pure and sweet and high in butterfat. It must have "spreadability." At least this is what New Zealand dairymen are seeking to introduce into their product in order that it may compete in English homes with Danish butter.

The spreadability issue is said to be a result of economic conditions. The thrifty housewife, intent upon making her pound of butter spread as many slices of bread as possible, is calling for a product that will not resist a cold chisel when she speaks to venerate the toast for an early breakfast.

Spreadability appears to be a spreading issue. Many an American housewife has emitted sundry ejaculations of chagrin as the butter knife carved into the bowl of gray while the butter, fresh from the tin box, has slid into the lap of an honored guest. Most butter users desire some degree of hardness, but one which shall not exceed the hardness of the knife that has to cut it.

Butter engineers, if such the experts in dairy products may be called, are said to be ready to introduce the desired spreadability into New Zealand butter. That is a very respectable accomplishment. For they thereby not only place their product on a plane with its chief competitor, but also substantially aid in promoting the "butter" relations between Great Britain and one of its most progressive dominions. — Christian Science Monitor.

### Famous Monument Damaged

**Pilgrim Fathers Monument in Massachusetts Hit By Lightning**

The national monument to the Pilgrim Forefathers, of Plymouth, Mass., reputedly the largest granite monument in the world, was struck and damaged by lightning during an electrical storm recently.

The figure representing law, near the base of the monument was badly damaged and the pedestal moved a few inches. Damage was estimated at between \$2,000 and \$3,000.

### Gives Credit To Butter

M. Demarec, who presided over the opening of the French senate recently, is 86, and the oldest member of the body. He looks young and vigorous, and he credits it all to butter.

"I eat three-quarters of a pound of butter every week," he said. "It is full of vitamins and most nourishing."

Although Lithuania produces no silver, its coins in the metal have a face value of \$1,240,000.

Nearly 500 miles of new highway is under construction in Hunan province, China.

Costa Rica's present coffee crop is expected to hit 500,000 bags.

**BABY'S COLDS**

Never "dose" except on doctor's advice

**VICKS**

BEST FOR ADULTS TOO

### An Unenviable Record

**United States Has Highest Murder Rate in World**

The United States still leads the civilized world in the number of murders per year, according to Dr. Frederick Hoffman, statistician, whose survey, based on homicide records from 180 cities, is published in the Spectator, an insurance periodical. The rate for the United States in 1932 was 10.8 homicides per 100,000 of population.

"Human life was never so cheap and insecure in the United States as it is at the present time," writes Dr. Hoffman, "and murder is decidedly more common in the country than in any other country of the world which makes a claim of being civilized. It is also the lamentable truth that crime and punishment in this country often lie far apart."

He noted that the rate for England and Wales in 1931 was 0.5 per 100,000 of population. He pointed out that of seventy-six deaths of males by homicide in these countries in 1931, firearms were used in but six cases, as compared with 66 per cent in the United States.

Dr. Hoffman cited the shooting of Mayor Cermak of Chicago and the narrow escape of President Roosevelt as instances of the case with which the number of murder can be acquired.

"Murder more than ever," he wrote, "is becoming an ingenious art, if not a trade, in this country and the number of murderers at large must be quite considerable."

### Only Successful Policy

**When Nations Work As One Family Progress Will Be Made**

If the world is to make progress we must face facts. The basic fact about the world of races is that they all belong to one human stock. They are one family. Any policy which treats them as so will in the end make for progress; any other will fail.

Note what is meant by this claim. It is a proved fact that the same mental powers belong to all races, some less developed, but all capable of development. The same moral capabilities are found in all nations: the capacity for honesty, courage, kindness. It is not fair to judge the less civilized by the more civilized.—James Reid.

### A Bad Custom

**Getting By Without Paying Is Not To Be Commended**

A Western Ontario paper defends young men who stole a ride on a train to see a hockey match in Toronto. It recalls that in the past nothing much was said when lads helped themselves to somebody's packing cases to start a fire with, or took apples from an orchard, or sneaked into the Caledonian games without paying anything at the gate. But one bad custom does not excuse another worse one. There are people who think it is clever to slip by the street car conductor without putting a ticket in the box, but they probably would not like to be caught doing it.

### Record Still Stands

The world's record for longest non-stop run in the history of railway operation, made in 1925 between Montreal and Vancouver, a distance of 2,937 miles, still stands. It was made by an oil-electric car evolved by Canadian National Railways motive power engineers. The journey was completed in 67 hours and the Rocky Mountains were crossed at a speed of 40 miles an hour.

### A Lucky Occupation

Babe Ruth has signed a contract to play with the New York Yankees for \$52,000 a year. He has been with the same team 14 years and has been paid over \$800,000. He is 39 years old and can retire at any time with an assured income of \$10,000 a year. Baseball has been good to him.

Speaking of the ten most beautiful words in the English language, how about this list: "Business is improving steadily so we are raising your salary."

### The Building Industry

**Timing Of Public Construction Projects For Depression Periods**

Timing of public construction projects for depression periods to help stabilize the construction industry is urged upon the federal government by the council of the Saskatchewan Association of Architects.

The council met at Regina recently to back up the decisions of a meeting of representatives of the construction industry held in Toronto in February.

Committees were appointed for Regina, Moose Jaw and Saskatoon whose duty it will be to discover what building could be undertaken by corporations which do not have to depend upon loans to finance construction.

### Guard Your Child Against Diphtheria

**Toxoid Treatment Is Simple and Harmless**

Diphtheria is a serious disease of the nose and throat caused by germs. It selects young children as its victims. Many children who have had diphtheria are left with some weakness, serious heart trouble, or even paralysis.

Protect your child against this foe of happy childhood. Toxoid treatment will protect your child.

This treatment is given in 3 visits, and is simple, harmless, and lasting. Your family doctor can give your child this protection.

If you have no family doctor, ask your health officer to advise you.

### THE RHYMING OPTIMIST

By ALAN MICHAELE

OASIS

An tree are in the desert,  
An island in the sea,  
Or the first star at twilight hour,  
So are you, my love, to me!

The traveller on Sahara  
Where all is burning, bare,  
Who finds a group of waving palms  
Has found an Eden there.

The captain of a vessel  
Long tossed by wave and wind  
Who sights at last a little lake,  
Leaves fear and care behind.

To you, my cool oasis,  
My fruitful life of rest,  
I turn my back with rapture's torch  
Alas! with my breast.

## Dry Goods and Ready-To-Wear

### Misses Suits

Fashioned from pure wool Rabbits Hair Cloth. 2 only. Sizes 16, 18. Colors: Navy Blue and Wine. Swagger style. Coat Silk lined. Regular \$21.00. Special \$16.75

### Women's Suits

Smart tailored suits of Pure Wool cloths. Blue and Black stripe; short coat style; well tailored. Coat silk lined. Sizes 18 to 20. Reg. \$21.00. Special \$16.75

### Children's Coats—Special \$3.45 each

Clearing line of Summer Tweeds and Wool Cloths. 14 only. Sizes 6 to 14 years. Reg. \$4.95 to \$7.50.

### Misses Skirts \$2.95 to \$5.25

Fashioned from light weight wool. Pastel and dark shades. Pleats, Flares and Sunburst effects. Sizes 14, 16, 18 and 20.

### Misses Skirts \$4.95 each

Tailored from Rough Silk Crepes. Pleated style. White and black only. Sizes 16, 18, 20.

### Smart New Blouses \$1.50 to \$3.95 each

They're new, style-right, finished with bows, ties and frills. Colors: white, Eggshell, Peach, Green and Plaid Silk.

### Women's and Misses' Pullover Sweaters

Wide and Puffed Sleeves. Newest color combinations; fashioned from pure wool. Sizes 34 to 40. \$2.00 to \$3.00

### Springtime's Smartest Millinery

The newest and most becoming shapes for Misses and Matrons. New pastel shades with brims. Colors: Mauve, Blue, Sand and Green. \$2.35, \$3.50 and \$4.50 each

### Canvas Shoes for Women, Misses and Children

Tans and Pastel shades for summer. Our stock is complete with sizes and colors.

## Much Tinkering With Former Acts

(Calgary Herald)

A synopsis of important acts passed at the recent session of the Alberta Legislature, prepared by the clerk of the executive council, has been issued. The session began on February 9 and closed on April 11, and the official summary deals with fifty nine pieces of legislation passed during that period. Of the fifty-nine, no less than forty-three were amending acts to former legislation. Of the legislation originating at this session, the major acts dealt with debt adjustment, borrowing, school districts, unemployment relief, track buyers' license, and highway traffic regulations. Debt adjustment and the public utilities amendment bill, which in its original form proposed to confer extraordinary powers on the board of public utilities, aroused the greatest amount of controversy, and in both cases public opinion compelled the government to agree to serious modification of the original drafts. These two bills in the form they were introduced to the house indicated that insufficient thought had been devoted to their preparation, and in consequence the discussions took up more time than should have been necessary.

Although the session is but a few weeks away, the courts are to be asked to define what the legislators meant by the expression, "bonafide farmer," as it is used in the Debt Adjustment Act. This implies a laxity on the part of the legislators which should be condemned. The bill was discussed at tremendous length and yet as soon as it emerges its context is not clear. All of which adds a flavor of irony to the poetic dictum appearing on the front page of the official synopsis of legislation:

"Twixt failure and success the point's so fine.  
Men sometimes know not when they touch the line."

### SPEAKS ON OXFORD GROUP

Last Sunday evening a full Church was in attendance to hear Pastor Hargreaves when he took as his subject: "My Impressions of the Oxford Group."

The people were urged to be tolerant—to give the movement a hearing and benefit by its many convictions. The speaker stated that there were things we couldn't agree upon, but not to lose sight of what we could. Continuing upon such a line of thought, Mr. Hargreaves' subject this Sunday will be "Two Essentials of Christian Fellowship." Make a special effort to be present and share the good things with us.

### BAPTIST YOUNG PEOPLE

The Baptist Young People's Society are holding their last house social for the season at the Baptist Parsonage at 8 o'clock, Monday next. An interesting evening is being planned and we are expecting to meet all our Young People who have been attending the meetings. Every room make a special effort to be present. You will remember our last social and good time—a hearty laugh is again in store for you—it will be a unique evening. We are full of surprises for your benefit.

### HUGE STILL FOUND BY LONG ISLAND POLICE

Hempstead, L.I. Federal agents raided a Long Island mansion on April 30 and came out with eight prisoners. They found inside this 27-room house the largest alcohol still ever found in the U.S. The still was built to turn out 5000 gallons of molasses alcohol daily.

**FOR SALE—TIMOTHY SEED**  
government test certificate No. 72-5473. Germination test 96 per cent. in 6 days. No noxious weeds. Price 5c. a pound sacked. John Conn, Phone R1004. Innisfail, Alta.

### SETTING EGGS

From purebred trapped Barred Rocks. 50c. for a setting of 13. Guaranteed 96 p.c. fertile. Apply W. H. Gilday, Lacombe.

### NOTICE

Tenders will be received by the undersigned up to noon on Saturday, May 6th, 1933 for the building of a warehouse (labour only) on the Lacombe U.F.A. property on Barnett Avenue, Lacombe, particulars of the plans and specifications for the proposed building may be obtained from the undersigned.

At the same time tenders will be received for the purchase and removal by June 1st, 1933 of the frame warehouse situated on the said property.

J. S. McCormick,  
Lacombe, Alberta

### TAYLOR'S TIRE SHOP

I have just installed a new rubber footwear repair outfit in connection with my vulcanizing plant and I am prepared to half sole or make any other repair necessary, at very small cost. Agent for Goodyear Tires and Tubes. Monarch Batteries; also re-charge batteries. About 50 good second hand tires for sale.

Top, side-curtain and awning repairs.  
Opposite Western Globe Office  
NANTON STREET

### TEAM WORK WANTED

If you want your garden plowed right, your ashes hauled away, or any other team work done, it will be to your interests to see Lloyd Hopius. His prices are moderate and his work is guaranteed satisfactory.
